CORRIGENDUM

Structural insight into gene transcriptional regulation and effector binding by the Lrp/AsnC family

Paul Thaw, Svetlana E. Sedelnikova, Tatyana Muranova, Sebastian Wiese, Sylvia Ayora, Juan C. Alonso, Arie B. Brinkman, Jasper Akerboom, John van der Oost and John B. Rafferty

*Nucleic Acids Res.* (2006) **34**, 1439–1449.

The authors would like to apologize for an error in their paper. The correct conditions for growth of *E. coli* AsnC crystals in space group P4, described in Materials and Methods, were 2.2 M MgCl\(_2\) in 0.1 M Bicine, pH 8.7, plus 5 mM L-asparagine.
