Distinct Genetic Structure Reflects Ploidy Level Differentiation in Newly Discovered, Extremely Small Populations of *Xanthocyparis vietnamensis* from Southwestern China

Authors: Yuliang Jiang, Tsam Ju, Linda E. Neaves, Jialiang Li, Weining Tan, Yusong Huang, Yan Liu and Kangshan Mao

**Fig. S1** Specimens of *Xanthocyparis vietnamensis* from northern population (left, signing "木论") and southern population (right, signing "那坡") differ in the size and shape of branchlets with scale-like leaves.
