S5. Bacterial organ burden at 24 hpi from male C3H mice infected with UTI89 pre-exposed for 2h to either plain male urine (mU, open triangle) or to male urine supplemented with 600 mg/dl glucose (open rectangle) (mUG). CFUs recovered from individual mice (two biological replicates) and median (flat line) are shown. *, P<0.05, Mann-Whitney U test.
