Table of Contents

The November online issue of Proceedings will be available by Tuesday, November 1. Sign up for an alert to the online Table of Contents at www.mayoclinicproceedings.org

In The Limelight

1761 In the Limelight: October 2022
Karl A. Nath

Editorials

1764 Heart Disease and Kidney Failure in the Black Community
Susanne B. Nicholas and Keith C. Norris

1766 Making a Case for the Anti-inflammatory Effects of ACE Inhibitors and Angiotensin II Receptor Blockers: Evidence From Randomized Controlled Trials
Naim Issa

Medical Image

1769 Pityriasis Amiantacea
Fangyi Xie and Sindhuja Sominidi-Damodaran

Perspective and Controversy

1771 SARS-CoV-2 Vaccines: The Mucosal Immunity Imperative
Eli Y. Adashi and Philip A. Gruppuso

Commentary

1774 Shaping the Screening, Behavioral Intervention, and Referral to Treatment (SBIRT) Model for Treatment of Alcohol Use Disorder in the COVID-19 Era
Celia C. Kamath, Sydney S. Kelpin, Christi A. Patten, Teresa A. Rummans, Hilal Maradit Kremers, Tyler S. Oesterle, Mark D. Williams, and Scott A. Breitinger

Continued
Original Articles

1780  Effectiveness of COVID-19 Booster on the Risk of Hospitalization Among Medicare Beneficiaries
Hemalkumar B. Mehta, Shuang Li, and James S. Goodwin
In a 4-month period similar to the period studied, about 69,225 hospitalizations could be prevented by boosters in the 15 million individuals aged 65 years or older currently not boosted.

1794  Echocardiography-Based Cardiac Structure Parameters for the Long-term Risk of End-Stage Kidney Disease in Black Individuals: The Atherosclerosis Risk in Communities Study
Minghao Kou, Manabu Hishida, Lena Mathews, Dalane W. Kitzman, Amil M. Shah, Josef Coresh, Scott Solomon, Kunihiro Matsushita, and Junichi Ishigami
In Black individuals residing in the community, echocardiographic parameters of left ventricular structure, including left ventricular wall thickness, were robustly associated with the risk of subsequent end-stage kidney disease.

1808  Effect of the Renin-Angiotensin System Inhibitors on Inflammatory Markers: A Systematic Review and Meta-analysis of Randomized Controlled Trials
Kamal Awad, Mahmoud Mohamed Zaki, Maged Mohammed, Joanna Lewek, Carl J. Lavie, and Maciej Banach; on behalf of the Lipid and Blood Pressure Meta-analysis Collaboration Group
Angiotensin-converting enzyme inhibitors showed a beneficial lowering effect on C-reactive protein, interleukin 6, and tumor necrosis factor α, whereas angiotensin receptor blockers were effective in reduction of interleukin 6 only.

1824  Indirect Comparison of Glucocorticoid-Sparing Agents for Remission Maintenance in Giant Cell Arteritis: A Network Meta-analysis
Sabine Mainbourg, Axel Tabary, Michel Cucherat, François Gueyffier, Hervé Lobbes, Marie Aussedat, Guillaume Grenet, Isabelle Duneu, Maxime Samson, and Jean Christophe Lega
With low to very low certainty of evidence, tocilizumab may be superior to other sparing agents to prevent giant cell arteritis relapse, and safety is comparable to the other drugs.

1836  Indigenous Smoking Behaviors in Olmsted County, Minnesota: A Longitudinal Population-Based Study
Ann M. Rusk, Rachel E. Giblon, Alanna M. Chamberlain, Christi A. Patten, Jamie R. Felzer, Yvonne T. Bui, Chung-Il Wi, Christopher C. Destephanio, Barbara A. Abbott, and Cassie C. Kennedy
Smoking prevalence was significantly higher in Indigenous people compared with an age- and sex-matched cohort in Olmsted County due to a smoking relapse rate three times higher than the non-Indigenous cohort.

1849  Acute Esophageal Necrosis: A Retrospective Cohort Study Highlighting the Mayo Clinic Experience
Anthony Robateau Colón, Amrit K. Kamboj, Catherine E. Hagen, Puru Rattan, Nayantara Coelho-Prabhu, Navtej S. Buttar, David H. Bruining, Andrew C. Storm, Mark V. Larson, Thomas R. Viggiano, Louis M. Wang Kee Song, Kenneth K. Wang, Prasad G. Iyer, David A. Katzka, and Cadman L. Leggett
In patients with an unclear diagnosis, esophageal biopsies may be helpful given the characteristic histologic findings.

1861  Pituitary Adenoma Incidence, Management Trends, and Long-term Outcomes: A 30-Year Population-Based Analysis
Christopher S. Graffeo, Karan J. Yagnik, Lucas P. Carlstrom, Nikita Lakomkin, Irina Bancos, Caroline Davidge-Pitts, Dana Erickson, Garret Choby, Bruce E. Pollack, Alanna M. Chamberlain, and Jamie J. Van Gompel
Pituitary adenoma is a highly incident disease, with prolactin-secreting and incidental lesions representing the majority of tumors.
### 1872 Sex Differences in Management and Outcomes Among Patients With High-Risk Pulmonary Embolism: A Nationwide Analysis

Ramy Sedhom, Michael Megaly, Ayman Elbadawi, George Yassa, Ido Weinberg, Martha Gulati, and Islam Y. Elgendy

In patients admitted with high-risk pulmonary embolism, women had higher rates of in-hospital mortality despite receiving advanced therapies more frequently, whereas the rate of major bleeding events was not different from men.

### 1883 Impact of Blood Lipids on 10-Year Cardiovascular Risk in Individuals Without Dyslipidemia and With Low Risk Factor Burden

Zhen Zhou, Kwok Leung Ong, Seamus P. Whelton, Matthew A. Allison, Andrea J. Curtis, Michael J. Blaha, Monique Breslin, Andrew Tonkin, Costan G. Magnussen, Matthew Budoff, and Mark R. Nelson

Except for triglycerides, all lipid variables were associated with atherosclerosis and future risk of cardiovascular disease among persons without dyslipidemia and with low risk factor burden.

### Medical Image

1894 Gardner Syndrome With Breast Desmoid Tumors

Santo Maimone and Jason T. Lewis

### Brief Report

1897 Effects of Replacing Sedentary Time With Physical Activity on Mortality Among Patients With Heart Failure: National Health and Nutrition Examination Survey Follow-Up Study

Youngdeok Kim, Justin M. Canada, Jonathan Kenyon, Hayley E. Billingsley, Ross Arena, Carl J. Lavie, and Salvatore Carbone

### Review

1904 Diabetic Kidney Disease Back in Focus: Management Field Guide for Health Care Professionals in the 21st Century

Radica Alicic and Susanne B. Nicholas

1920 Overview of Lymphedema for Physicians and Other Clinicians: A Review of Fundamental Concepts

Oscar J. Manrique, Samyd S. Bustos, Pedro Ciudad, Kian Adabi, Wei F. Chen, Antonio J. Forte, Andrea L. Cheville, James W. Jakub, Sarah A. McLaughlin, and Hung-Chi Chen

### Residents’ Clinics

1936 20-Year-Old Postpartum Woman With Hypoxia and Tachycardia

Roberto Herrera, Ikram Haq, and Nandan S. Anavekar

1942 46-Year-Old Man With Presyncope and Rash

Shirin I. Nour, Samuel A. Shabtaie, and Christopher V. DeSimone

1947 70-Year-Old Man With Dizziness and Nausea

Stacey C. Rolak, Timothy T. Xu, and Emily L. Leasure
Medical Image

1953 Breakthrough Invasive *Fusarium* Orbital Rhinosinusitis With Meningitis
Reema K. Tawfiq, Nischal Ranganath, Vance Lehman, Linda X. Yin, and Audrey N. Schuetz

Path to Patient Image Quiz

1956 Prepubertal-Type Testicular Tumors in Postpubertal Patients: Epidermoid Cyst and Well-Differentiated Neuroendocrine Tumor
Sounak Gupta and Lori A. Erickson

Art at Mayo Clinic

1958 *Four Houses* by Jennifer Bartlett
Margaret R. Wentz
