Water Supply

Volume 22, Number 2

Contents

1183  Non-perpendicular incidence angle of cold atmospheric-pressure plasma treatment for fabrication of silver-based surface plasmon resonance biosensor for detection of Escherichia coli in water
Maryam Hosseinpour, Akbar Zendehnam, Seyyedeh Mehri Hamidi Sangdehi and Hamidreza Ghomi Marzdashti

1199  Enhancing chlorine resistance in polyamide membranes with surface & structure modification strategies
Muhammad Faisal Idrees and Umar Tariq

1216  Detection of abrupt shift and non-parametric analyses of trends in runoff time series in the Dez river basin
Hooman Gholami, Yahya Moradi, Morteza Lotfifrad, Mohammad Amin Gandomi, Nooredin Bazgir and Manoochehr Shokrieh Hajibehzad

1231  Effects of pH on phosphorus form transformation in lake sediments
Shengnan Zhao, Xiaohong Shi, Biao Sun, Yu Liu, Zhiqiang Tian and Jussi Huotari

1244  Hydrus-1D simulation of two-stage cross-flow pre-filtration of turbid river water
Goldie Davis and Edwin Ekwue

1255  Genetic algorithms for optimizing stepped spillways to maximize energy dissipation
Farzin Salmasi and John Abraham

1275  Comprehensive analysis of water-sediment variation characteristics at the confluence of the upper reaches of the Weigan River and Heizi River with multiple methods and multiple influencing factors
Mingwang Zhang and Kebin Shi

1293  Hydraulic transients for a pipe line network of treated effluent rising main using SAP 2R
Ajmal Hussain, Muhammad Mustafa, Hazi Mohammad Azamathulla and M. R. Sadique

1306  Performance analysis of N identical PVT-CPC collectors with an active single slope solar distiller and helically coiled heat exchanger using CuO nanoparticles
Dharamveer, Samsher and Anil Kumar

1327  An efficient low-cost–low-technology whole-household water collection and treatment system
O. I. Okogwu, F. A. Elebe and G. N. Nwonumara

1337  Characteristics of adsorption kinetics and isotherms of Cu(II) by sediment under different hydrodynamic of the Ganjiang river, China
Xianluo Shi, Wei Zhang and Baotong Li
Comprehensive assessment of urban water resources carrying capacity based on basin unit: a case study of Qingdao, China
Ling Yang and Lin Wang

Evaluation of temporal variability and stationarity of potential evapotranspiration in Peninsular Malaysia
Hui Theng Hue, Jing Lin Ng, Yuk Feng Huang and Yi Xun Tan

Hydrological peaks evaluation at Chitral and Tarbela stations, Pakistan, using combined Bayesian regularized neural network and signal difference average based variational mode decomposition method: A case study
Mehwish Shafi Khan and Syed Ahmad Hassan

Performance-based multi-objective design and expansion of water distribution networks considering life cycle costs and future demands
Swati Sirsant and M. Janga Reddy

Effect of hydrodynamic breakage on floc evolution and turbidity reduction in flocculation and sedimentation processes
Xinran Zhang, Jiaqi Zhu, Zhenxing Li, Junyi Li and Pengfei Ren

Assessment of sustainability index for rural water management using ANN
R. Raghavendra Kumar, Gaurav Kumar and Rajiv Gupta

Smart water grid: a review and a suggestion for water quality monitoring
B. Bharani Baanu and K. S. Jinesh Babu

Variable fuzzy evaluation model for water resources carrying capacity in the Tarim River Basin, China
Lihong Meng, Youcun Liu, Weijing Ma, Qingyun Wang, Xiaoli Mo and Jinming Tian

In-situ pumping tests and numerical simulations of seepage wells in the Yellow River valley, China
Xianmin Ke, Wei Wang, Jinlong Li, Qiming Sun, Lulu Lian, Xiangdong Xu and Qiaofen Lyu

Real-time burst detection based on multiple features of pressure data
Xiangqiu Zhang, Zhihong Long, Tian Yao, Hua Zhou, Tingchao Yu and Yongchao Zhou

The effect of the rainfall on the nitrogen fertilizer schedule of maize in Jilin, China
Yu Bai and Yufeng Zhao

A risk assessment model of WSMC projects under emergencies
Xiaosheng Wang, Wei Li, Haiying Guo and Ran Li

Quantitative analyzes of virtual water net exports under the impacts of natural changes and human activities in the last 20 years in Shandong Province, China
Xiuxiu Sun, Weiping Wang, Shisong Qu, Wenliang Li, Weidong Zhao and Yujie Meng

Prediction of longitudinal and transverse profiles of pressure flushing cones using artificial intelligence and data pre-processing
Mehdi Daryaee, Farshad Ahmadi, Peyman Peykani and Mohammadreza Zayeri

Numerical analysis of hydrodynamics influenced by a deformed bed due to a near-bank vegetation patch
Zijing Yi, Yi Sun, Xiekang Wang, Daoxudong Liu and Xufeng Yan

Experimental and numerical investigation of flow over a spillway bend with different combinations of permeable spur dikes
Jinmeng Yang, Zhenzhong Shen, Jing Zhang, Xiaomin Teng, Wenbing Zhang and Jie Dai

Persistent and mobile organic chemicals in water resources: occurrence and removal options for water utilities
Marco Scheurer, Anna Sandholzer, Tobias Schnabel, Stephanie Schneider-Werres, Mario Schaffer, Hilmar Börnick and Silvio Beier
The optimal allocation of water resources oriented to prioritizing ecological needs using multiple schemes in the Shaying River Basin (Henan Section), China

Hang Li, Xiao-Ning Qu, Jie Tao, Chang-Hong Hu and Qi-Ting Zuo

Achievements, challenges and opportunities of rainwater harvesting in the Ethiopia context: a review

Negash Tessema Roba, Asfaw Kebede Kassa, Dame Yadeta Geleta and Birhanu Kindshih Hishe

Self-forming dynamic membrane filtration for drinking water treatment

Suna Ozden Celik, Nese Tufekci and Ismail Koyuncu

A review of the progress in Chinese Sponge City programme: challenges and opportunities for urban stormwater management

Feiran Li and Jianfeng Zhang

Evaluation of polyvinylpyrrolidone as draw solute for desalination forward osmosis systems

Quang Trung Nguyen, Minh Tao Hoang, Tuan Hung Trinh, Ngoc Tung Nguyen and Truong Giang Le

Optimal operation of single and multi-reservoir systems via hybrid shuffled grey wolf optimization algorithm (SGWO)

Fariborz Masoumi, Sina Masoumzadeh, Negin Zafari and Mohammad Javad Emami-Skardi

Experimental study on phosphate rock modified soil-bentonite as a cut-off wall material

Yuheng Li, Xing Zeng, Zhi Lin, Jia Su, Tong Gao, Renjian Deng and Xi Liu

Experimental analysis of infiltration process and hydraulic properties in soil and rock profile in the Taihang Mountains, North China

Jiansheng Cao, Hui Yang and Yong Zhao

Virtual water trade and its implications on water sustainability

Shiv Narayan Nishad and Naresh Kumar

Coupled effect of seawater intrusion on groundwater quality: study of South-West zone of Surat city

Ankit N. Chaudhari, Darshan J. Mehta and Neeraj D. Sharma

Study on hydrogeochemical connection and water quality assessment of subsidence lake and shallow groundwater in Luling coal-mining area of the Huaibei coalfield, Eastern China

Jiying Xu, Herong Gui, Yuting Xia, Honghai Zhao, Chen Li, Jiayu Chen, Chunlei Wang and Chen Chen

A comprehensive runoff variation evaluation system of the Yarlung Zangbo River based on vague sets

Xiaolu Zhang, Linglei Zhang, Min Chen, Dian Li, Min Peng, Yong Li and Jia Li

Spatiotemporal variability of soil-water characteristic curve model parameters of Lanzhou collapsible loess

Wenju Zhao, Yuhang Liu, Jiazhen Hu and Zongli Li

Experimental study of the rheology of water-kaolinite suspensions

Zhongfan Zhu

Estimating output flow depth from Rockfill Porous media

Hadi Norouzi, Mohammad Hosein Hasani, Jalal Bazargan and Seyed Mohammad Shoaei

Simple hydro-economic tools for supporting small water supply agencies on sustainable irrigation water management

A. Alamanos

Study on the proportion and flow path of Yangtze River water diversion into Taihu Lake

Zhibing Hu, Pang Yong, Xu Ruichen and Liu Yuan

Optimization of pipeline lifecycle cost using alternatives with different life spans

Ibrahim H. Elsebaie and Abdurrahman Al-Khomairi
1848 Quantitative assessment of ecological operation effects based on flood pulses and ecology-economic coupling model: a case study of Three Gorges Reservoir, China
  Jiqing Li, Jing Huang, Zhiming Xue, Pengteng Liang and Yueqiu Wu

1863 Effects of land use and nutrients on the characteristics of dissolved organic matter in the Nanchong Section of Jialing River, China in December 2019
  Liuqing Zhang, Xiaohua Zhu, Xing Huang, Chaorong Liu and Yan Yang

1876 Hydraulic characteristics of countercurrent jets on adverse-sloped beds
  Lei Wang, Zhen Li and Ming-jun Diao

1889 Forecast of regional water demand based on NSGAI-FORAGM
  Jun Li, Chunye Liu and Li Tang

1905 The effects of splitters on the downstream scour hole of overflow spillways: application of support vector regression
  Mohammad Ehsan Asadi, Seyed Taghi Omidi Naeni and Reza Kerachian

1910 Investigations of the response mechanism of a karst interconnected River System Network in Guizhou Province, China
  Dan Zhang, Zuo-qing Guo, Hui-xia Yang and Cai-hong Liu

1943 Parameters for effective sand filtration of *Schistosoma mansoni* cercariae from water
  Laura Braun, Yasinta Daniel Sylwester, Meseret Dessalegne Zerefa, Mulwuk Maru, Fiona Allan, Feleke Zewge, Aidan M. Emery, Safari Kinung’hi and Michael R. Templeton

1951 Integration of advanced optimization algorithms into least-square support vector machine (LSSVM) for water quality index prediction
  See Leng Chia, Min Yan Chia, Chai Hoon Koo and Yuk Feng Huang

1964 Using data mining methods to improve discharge coefficient prediction in Piano Key and Labyrinth weirs
  Mahdi Majedi-Asl, Mehdi Fuladipanah, Venkat Arun and Ravi Prakash Tripathi

1983 The impacts of increasing water scarcity and the potential for water-related conflict in Lamu, Kenya
  Yvonne Maingey, Maggie Opondo, Daniel Olago and Gilbert Ouma

1995 Runoff-associated nitrogen and phosphorus losses under natural rainfall events in purple soil area: the role of land disturbance and slope length
  Ke Liang, Xiaorong He, Binghui He, Xiaomeng Guo and Tianyang Li

2008 Evaluation of rural water supply sustainable operation and management based on cyclic correction framework – a case study of Chongqing, China
  Linlin Fan, Yalong Li, Wenbing Luo, Wei Qiao, Wei Li, Fengli Liu and Yaning Liu

2024 Water quality analysis and health risk assessment of the Lanzhou section of the Yellow River
  Kai Ma, Hao Ren, Tianhong Zhou, Fuping Wu and Guozhen Zhang

2034 PCA driven watershed prioritization based on runoff modeling and drought severity assessment in parts of Koel river basin, Jharkhand (India)
  Stuti Chaudhary and Arvind Chandra Pandey

2055 Cost minimization of groundwater supply to a central tank
  Nikolaos Nagkoulis and Konstantinos L. Katsifarakis

2067 Aquifer storage of treated wastewater for subsequent recovery as an important strategy for sustainable water security in Kuwait
  Afnan S. Al-Huwaishel, Abdirashid Elmi and Amitabha Mukhopadhyay

2082 Complex mechanism of sulphane odour production in water heating and suitable remedial measures
  Jaroslav Šašek and František Kožišek
2093 Mathematical simulation of air-water flow along Ski Jump Jet
Roghayeh Ahmadpour, Hamed Sarkardeh and Hazi Azamathulla

2106 The simultaneous removal of bisphenol A, manganese and ammonium from groundwater by \( \text{MeO}_x \); the role of chemical catalytic oxidation for bisphenol A
Yingming Guo, Ben Ma, Jianxiong Huang, Jing Yang and Ruifeng Zhang

2117 Shaping a baseflow model through multiple regression analysis: the Çoruh watershed example
Serkan Şenoçak and Sait Taşçı

2133 Reliability-based optimization of water distribution networks
Nikita Palod, Vishnu Prasad and Ruchi Khare

2148 Determinants of geographical inequalities in domestic water supply across city of Pune, India
Jyoti Jain Tholiya, Navendu Chaudhary and Bhulyan Monwar Alam

2170 Physical modeling of sand columns application in recharge reservoir to prevent seawater intrusion
Hamzah Yusuf, Akhmad Azis, Sugiarto Badaruddin, Andi Muhammad Subhan Salby, Zuliyah Faisal and Zubair Saing

2179 Engineered hyporheic zones: design and applications in stream health restoration – a review
Ankit Tewari, Prabhat Kumar Singh and Shishir Gaur

2194 A study of saltwater intrusion in the Kallada River, southwest coast of Kerala, India
S. Chithra, Sabu Joseph and N. Kannan

2212 Effect of cadmium sorption by river sediments on longitudinal dispersion
Mohsen Nasrabad, Ali Mahdavi Mazdeh and Mohammad Hossein Omid

2227 Evaluating regional agricultural water resources system resilience and analyzing driving factors in the Hongxinglong Administration
Dan Zhao, Dong Liu, Qiumei Wang, Qiuyuan Li and Xu Liang

2243 Start-up strategies for nitrification and manganese oxidation on a single stage RSF for drinking water production
Thomas Etcheberry, Matthieu Peyre Lavigne, Rosalia Trias, Stéphane Brunner, Juan Torres Zuluaga, Lodovico Di Gioia and Etienne Paul

2257 Removal performance and mechanism of typical amino acids in water by the peroxymonosulfate/\( \text{Fe}_3\text{O}_4 \) nanoparticles
Yuye Luo, Cheng Liu, Meiqi Zhao and Tariq Mehmood

2269 Reducing the conflict of interest in the optimal operation of reservoirs by linking mesohabitat hydraulic modeling and metaheuristic optimization
Mahdi Sedighkia, Bithin Datta and Asghar Abdoli

2277 Multi-objective reservoir operation of the Ukai reservoir system using an improved Jaya algorithm
Vijendra Kumar and S. M. Yadav

2311 Study on the streamflow compensation characteristics of reservoirs in Luanhe River Basin based on Copula function
Fang Wan, Lingfeng Xiao, Qihui Chai and Li Li

2322 Development of an Integrated Irrigation Water Quality Index (IIWQIndex) model
Md. Shahedul Islam and M. G. Mostafa

2338 Effects of the Karkheh Dam construction on haze generation due to geomorphological changes in the Khuzestan Province, Southwest Iran
Arash Adib
2351 Removal of arsenic from polluted water through adsorption onto selected soil
   Wenzhu Wu, Min Guo, Lili Shi and Yueguang Zhou

2359 Optimal location of pumping wells by a mesh-free numerical method
   Masuod Abdi, Hossein Ebrahimi and Abolfazl Akbarpour
