In the originally published version of this manuscript, some changes were required and are detailed in this corrigendum.

The application of the C*-algebra non isomorphic to its opposite already appeared in [32] and has now been removed. References have been added to [32], particularly pointing out the results which were proved in [32] for finite groups and are proved here for compact groups. The proof of Example 1.4 has been removed as it can also be found in [32].
