S1 File Fig A. Flow diagram indicating participant selection into final analytic sample.

1,548 women enrolled PROTECT prior to Hurricane Maria (Sept 2017) → 498 women withdrew, dropped out, or had gestational information unavailable at the time of analysis

1,050 women with completed pregnancies and gestational age information available as of Feb 2019 → 3 women missing all covariate information

1,047 women with ≥1 covariate information available → 107 preterm and 940 full term births included in present analysis

498 women withdrew, dropped out, or had gestational information unavailable at the time of analysis

3 women missing all covariate information

107 preterm and 940 full term births included in present analysis
S1 File Fig B. Distribution of Perceived Stress Scale (PSS) across demographic characteristics.

*Indicates p-value <0.05.
Abbreviations: SD, standard deviation.
Note: black indicates reference levels; p-values calculated from linear models.
S1 File Fig C. Distribution of Life Experience Survey (LES) across demographic characteristics.

*Indicates p-value <0.05.
Abbreviations: SD, standard deviation.
Note: black indicates reference levels; p-values calculated from linear models.
S1 File Fig D. Distribution of Center for Epidemiologic Studies-Depression (CES-D) across demographic characteristics.

*Indicates p-value <0.05.

Abbreviations: SD, standard deviation.

Note: black indicates reference levels; p-values calculated from linear models.
Indicates p-value <0.05.
Abbreviations: SD, standard deviation.
Note: black indicates reference levels; p-values calculated from linear models.
S1 File Fig F. Distribution of ENRICHD Social Support Instrument (ESSI) across demographic characteristics.

*Indicates p-value <0.05.
Abbreviations: SD, standard deviation.
Note: black indicates reference levels; p-values calculated from linear models.
S1 File Fig G. Effect of perceived stress on depression moderated by social support.
S1 File Fig H. Full model including of all psychosocial stress measures, confounders, and effect modifiers.
