Abstract

In a very short time, the Coronavirus disease (COVID-19) caused by the SARS-CoV-2 virus, has become a global pandemic. It has infected about 29,155,581 patients and brought forth death rate about 926,544 among 216 countries as recorded by World Health Organization on 15th September 2020. Currently, there is no specific and direct treatment or vaccine for this infectious disease. No therapeutic options available to cure the infection in till date which increases the mortality rate across the countries. Siddha Herbal medicines are achieving high attention because of the extensive therapeutics like potent anti-microbial, immunomodulatory, anti-inflammatory, and antioxidant properties. Ministry of AYUSH, Govt. of India recommended 12 Siddha herbals (Inji – Zingiber officinale, Thulasi – Ocimum sanctum, Milaku – Piper nigrum, Karunjeeragam – Nigella sativa, Keezhanelli – Phyllanthus niruri, Adhimathamuram – Glycyrrhiza glabra, Vellaippoondu – Allium sativum, Citramutti – Sida cardifolia, Seenthil – Tinospora cordifolia, Manjal – Curcuma longa, Elumitchai – Citrus lemon and Vembu – Azadirachta indica) for the prevention by enhancing immunity as well as for the management of this infectious disease in its recent official publication ‘Guidelines for Siddha Practitioners for COVID 19’. This is the common advisory and the anti-viral activity of these herbals against COVID 19 is not established yet. The current situation demands proper herbal drug utilization to prepare the population immunity to fight against the infection. The present review spotlight on the literature review and the review of pharmacological actions of these herbals.

Key Words: Siddha Medicine, Antiviral herbs, Phytochemicals, Immunity boosting, SARS-CoV-2, AYUSH.

Introduction

Coronavirus Disease 2019 (COVID-19) is defined as illness caused by a novel coronavirus now called Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2; formerly called 2019-nCoV), which was first identified amid an outbreak of respiratory illness cases in Wuhan City, Hubei Province, China (1). Initially it was reported to the WHO on 31st December 2019. WHO declared the COVID - 19 outbreaks a global health emergency on 30th January 2020 (3, 4) and global pandemic on 11th March 2020 (5). This global pandemic in a short time has infected about 29,155,581 patients and brought forth death rate about 926,544 among 216 countries as mentioned by World Health Organization on 15th September 2020 (6). The main symptoms include: Fever or chills, Cough, Shortness of breath, Trouble breathing, Fatigue, Body aches, Headache, Running or stuffy nose, Sore throat, Loss of smell or taste, Nausea, Diarrhoea (2). Presentations of COVID-19 have ranged from asymptomatic/mild symptoms to severe illness and mortality. Symptoms may develop two days to two weeks following exposure to the virus (7). Currently, there is no specific treatment or vaccine for fighting against this infectious disease and scientists agree that possible therapeutic may arise through drug repositioning. Herbal medicines are achieving high attention because of the extensive therapeutics like potent anti-viral, immuno-modulatory, anti-inflammatory, and antioxidant properties. Siddha System of Medicine (SSM) is an ancient Medical system which is in Tamil language flourished more in southern part of India. This medical system has its own school of terminologies for naming the diseases, signs and symptoms, diagnostic methods, pharmacological and non-pharmacological therapies in the Tamil language. In SSM, Epidemics/Pandemics are mentioned as “Uzhi Noi”. In general, they are classified under “Kollai Noikal” (Communicable Diseases) which are most commonly occurred the time of “Ayana Santhi” months (Means end a month of Uthara Ayanam & Thatchana Ayanam), fall on Aadi and Maargazhi month in Tamil Calendar. It is believed that in those days, the immunity of human beings will be low based on Mukkutram Theory (Three humoral theories – Vaatham, Piththam and Kabam) (8).

The symptoms present in COVID-19 are compared with the disease ‘Kabasuram’ mentioned in SSM. As per the Siddha literature tamil quote ‘ver paaru thazhai paaru minjinakkaal parpa chenduram paarae’, herbal medicines are the first choice of drugs for all diseases in SSM, if satisfied result not occurs with herbal ingredients, higher order medicines prepared from Metal and Mineral, and from Marine products are prescribed. So, this emphasizes the usage and importance of Herbals in SSM (9).

Ministry of AYUSH, Govt. of India recently released its official publication ‘Guidelines for Siddha Practitioners for COVID 19’ on May 31, 2020. This guideline recommended Siddha herbs for the prevention by enhancing immunity as well as for the management of this infectious disease which are being prescribed for acute viral and bacterial respiratory diseases and other chronic respiratory diseases in SSM from ancient times.

Table I –Anti-Viral Siddha Herbs and their therapeutic uses in SSM (8, 10)

| S.No | Common Name | Botanical Name | Usage |
|------|-------------|----------------|-------|
| 1    | Inji        | Zingiber officinale ROSC. | 1. Inji Surasam – Herbal water infusion made up of half teaspoon of Chukku (Dried Ginger) boiled in two liters of water can be used as drinking water -10 ml Once a day  
2. Inji Thenooral – dipped and processed in honey – one piece at early morning  
3. Inji Tea (Ginger tea) as hot beverage |
| 2    | Thulasi     | Ocimum tenuiflorum L. | 1. Thulasi Kudineer – Prepared as decoction - 60 ml Twice a day  
2. Used as Steam inhalation |
| 3    | Milagu      | Piper nigrum L. | 1. With Thulasi as Kudineer - Prepared as decoction - 60 ml Twice a day  
2. A quarter teaspoonful of Manjal (Turmeric) with one pinch of Milagu (Pepper) is added in boiling milk and taken at bed time. |
| 4    | Karunjeerakam | Nigella sativa L. | Karunjeeraka Chooranam - Prepared as powder - 1gm Twice a day |
| 5    | Keezhaneli  | Phyllanthus amarus SCHUM. & THENN. | Keezhaneli Samoolam (whole plant) – Prepared as powder - 2gm Twice a day |
| 6    | Athimadhuram | Glycyrrhiza glabra L. | 1. Athimadhura Chooranam - Prepared as powder - 1 gm Twice a day  
2. Adhimadhuram (Licorice) Tea – taken as hot beverage |
| 7    | Vellaipoondu | Allium sativum L. | Poondathaen – Juice of Poondu (Garlic) is processed with honey by heating process then used as externally to apply on tongue, tonsils and oral cavity |
| 8    | Citra mutti | Sida cordifolia L. | Citramutti Kudineer - Prepared as decoction - 30 ml Twice a day |
| 9    | Seenthil    | Tinospora cordifolia (WILLD.) HOOK.F. & THOMS. | Seenthil Chooranam – Prepared as powder - 1gm Twice a day |
| 10   | Manjal      | Curcuma longa L. | 1. A quarter teaspoonful of Manjal (Turmeric) with one pinch of Milagu (Pepper) is added in boiling milk and taken at bed time.  
2. Water boiled with a pinch of Salt and Manjal (Turmeric) should be used for gargling not less than 3 times |
| 11   | Elumitchai  | Citrus limon (L.) BURM.F. | Elumitchai (Lemon) Tea – taken as hot beverage |
| 12   | Vembu       | Azadirachta indica A. JUSS. | Vembu (Neem) leaves fumigation is advocated for Environmental sanitation |
| S.No | Common Name                  | Part used                          | Actions                              | Indications                                                                 |
|------|-----------------------------|------------------------------------|--------------------------------------|-----------------------------------------------------------------------------|
| 1    | *Inji – Zingiber officinale* | Rhizome                            | Stimulant, Stomachic, Carminative     | Dyspepsia, Heartburns, Flatus, Cough, Asthma, Diarrhea, Sinusitis, Peptic Ulcer, Anemia, Fever |
| 2    | *Thulasi - Ocimum sanctum*  | Leaf, Seed                         | Stimulant, Expectorant, Demulcent, Diaphoretic | Psychiatry diseases, Sinusitis, Fever, Vatha and Kaba diseases               |
| 3    | *Milagu - Piper nigrum*     | Seed                               | Acid, Carminative, Antiperiodic, Rubefacient, Stimulant, Resolvent, Antivatha, Antidot | Fever with chill, Anemia, Phlegm, Diarrhea, Gastritis, Flatulence, Anorexia, Hemorrhoids, Cough, Paralysis, Earache, Indigestion, Jaundice |
| 4    | *Karunjeerakam - Nigella sativa* | Seed | Carminative, Diuretic, Emmenagogue, Galactogogue, Anthelmintic, Stomachic, Parasiticide, Emollient | Eczema, Skin ulcer, Diseases of the head, Eye diseases, Scabies, Flatulence, Gastric ulcer, Chest pain, Cough, Vomiting, Swelling, Jaundice |
| 5    | *Keezhanelli - Phyllanthus niruri* | Whole plant | Deobstruend, Diuretic, Astringent, Cooling | Abdominal discomfort, Eye diseases, Bleeding diarrhea, Diabetes, Jaundice, Fever caused by abnormalities in seven physical constituents, Chronic syphilitic ulcer, Dryness of the tongue, Thirst |
| 6    | *Athimadhuram - Glycyrrhiza glabra* | Root | Tonic, Emollient, Laxative, Mild expectorant. | Liver disorders, Fever, Phlegmatic affections, Cough, Headache, Eye diseases, Psychiatric illness, Diseases of bone and as Antidote |
| 7    | *Vellaipoondu - Allium sativum* | Rhizome | Stimulant, Stomachic, Carminative, Tonic, Alterative, Expectorant, Anthelmintic, Diuretic | Small boils, Deafness, Chronic cough, Asthma, Worm infestations, Thirdosha diseases, Vatha diseases, Headache by imbalanced kabam, Heaviness of the head, Dysentery, Hemorrhoids |
| 8    | *Citra mutti - Sida cordifolia* | Whole plant | Emollient | Fever associated with bone disorders, Pitha diseases, Thirst, Diarrhea, Flatulence, Gastritis, Fever by Vatha imbalance |
| 9    | *Seenthil - Tinospora cordifolia* | Stem | Alterative, Stimulant, Demulcent, Antiperiodic | Fever, Diabetes, Skin diseases, Diarrhea, Hypertension, Purpura |
| 10   | *Manjal - Curcuma longa*    | Rhizome                            | Stimulant, Carminative, Hepatic tonic | Vomiting, Thridosham imbalance, Headache, Heaviness of the head, Running nose, Five types of fits, Swelling, Skin ulcer |
| 11   | *Elumitchai - Citrus limonia* | Leaf, Unripe fruit, Fruit juice, volatile oil | Refrigerant, Rubefacient, Carminative | Thridosham Imbalance, Pricking Pain, Vomiting, Gastric Ulcer, Pitha Diseases, Psychiatry Diseases, Giddiness, Nausea, Thirst, Eye diseases, Earache, paronychia |
| 12   | *Vembu - Azadirachta indica* | Leaf, Stem bark, Root bark, Flower, Unripe fruit, Fruit, Seed, Seed oil, Pisin | Anthelmintic, Stimulant, Discutient | Vomiting, Dyspepsia, Thirst, Skin diseases, Fever, Convalescence after fever, Indigestion, Vathya diseases, Peptic ulcer, Worm infestation |
| S.No | Common Name                      | Phytochemical                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1    | *Inji – Zingiber officinale*     | Cardiac glycosides, Alkaloids, Saponins, Tannins, Flavonoids, Sesquiterpenoids, Monoterpenes, Bisapolen, Zingiberene, and Zingiberol (Connel D), 6-Shogaol, Gingerols, Zingerone, Paradol, Zingerone, Geraniol, Gingerols, Gingerdiols, Gingerdiones, and Dehydrogingerdiones (12, 13)                                                                                                      |
| 2    | *Thulasi – Ocimum sanctum*       | The leaves contain 0.7% volatile oil comprising about 71% Eugenol and 20% Methyl eugenol. The oil also contains Carvacrol and Sesquiterpine hydrocarbon caryophyllene. Fresh leaves and stem extract yielded some phenolic compounds (antioxidants) such as Cirsilineol, Circmaritin, Isothymusin, Apigenin and Rosameric acid, Ursolic acid, Apigenin, Luteolin, Apigenin-7-O-glucuronide, Luteolin-7-O-glucuronide, Orientin and Molludistin have also been isolated from the leaf extract. It also contains a number of sesquiterpenes and monoterpenes viz., Bornyl acetate, -Elemene, Neral, - and -Pinenes, Camphene, Campesterol, Cholesterol, Stigmasterol and -Sitosterol (14, 15) |
| 3    | *Milagu – Piper nigrum*          | Propanedioic acid, Dimethyl ester, Bicyclo heptane, 3-Carene, Cyclohexene, Piperine, Ursodeoxycholic acid, Piperidine, Piperettine and Piperanine, Stigmasterol (16)                                                                                               |
| 4    | *Karunjeerakam – Nigella sativa* | Seeds contain Thymoquinone (30%-48%), Thymohydroquinone, Dithymoquinone, p-Cymene (7%-15%), Carvacrol (6%-12%), 4-Terpineol (2%-7%), t-Anethol (1%-4%), Sesquiterpine longifolene (1%-8%) α-Piine and Thymol. The seeds are also containing good amount of various vitamins and minerals like Cu, P, Zn and Fe. Root and shoot are reported to contain Vanillic acid. The seeds reported to contain a fatty oil rich in unsaturated fatty acids, mainly Linoleic acid (50-60%), Oleic acid (20%), Eicodadienoic acid (3%) and Dihomolinoleic acid (10%). (17) |
| 5    | *Keezhanelli – Phyllanthus niruri* | Rutin, Quercetin, Quercitrin, Astrapalin, Gallocatechin, Nirurin, Niruriflavone, Limonene, p-Cymene, Lupeol, Ellagic acid, Methyl brevifolincarboxylate, Phyllanthin and Hypophyllanthin, Nirurin, Nirutralin, Phytletralin and Lintetralin, Repandusinic acid, Norsecurinine, Diosgenin. (18)                                                                                     |
| 6    | *Athimadhuram – Glycyrrhiza glabra* | Triterpenoid saponins (4–20%), mostly Glycyrrhizin, a mixture of potassium and calcium salts of 18β-glycyrrhizic acid, triterpenes included Liquiritic acid, Glycyretol, Glabrolide, isoglaborlide and Liquorice acid. 18β-glycyrrhizic acid (3-O-(2-O-β-d-glucopyranuronosyl-α-d-glucopyranosyl)-3-β-hydroxy-11-oxo-18β,20β-olean-12-en-29-oic acid) (19) |
| 7    | *Vellaipoondu – Allium sativum*  | allilin, vitamin C, gallic acid, catechin hydrate, fructose, glucose, adenosine, arginine, ascorbic-acid, calcium, magnesium, potassium, quercetin, trytophan and tyrosinase. (20)                                                                                                                                                                                                                                                                           |
| 8    | *Citra mutti – Sida cordifolia*  | Large amount of Ephedrine, Sterculic, Malvic and Coronaric acid along with other fatty acids, Pseudoephedrine, Saponine, Choline pseudoephedrine, Betaphenethylamine, Vascine, Hypaphorine, Ecdyterone and related indole alkaloids, Palmitic, Stearic and β – sitosterol, Hexacosanoic acids, 6-phenyl ethyl amine, Carboxylated tryptomines, Quanzoline, Hypaphorine, Vasicinol (21)                                                                                           |
| 9    | *Seenthil – Tinospora cordifolia* | Stem and root part contain alkaloids as active constituents. These are Tembetarine, Choline, Magnoflorine, Berberine, Tinosporin, Isocolumbin, Palmetine, Jatrorrhizine, Aporphine alkaloids, Tetraydroiapalmatine. Whole plant of contain Furanolactone, Diterpenoid Lactones, Cleodrane derivatives, Columbin tinosporides, Tinosporin, Jateorine. Shoot part of contains Steroids (B-sitosterol, δ-sitosterol, 20 β-hydroxyecdyson, giloinsterol, Makisterone A, Ecdyterone). Stem part contain Glycosides. Their active constituents are 18-norclosdrane glucoside, Tinocordifolioside, Cordioside, Cordifoliside A, B, C, D and E, Furanooid diterpine glucoside, Syringin, Pregnane glycoside Syringing-apiosylglycoside, palmatosides, The other parts contain active constituents such as Jatrorrhizine, Tinosporic acid, 3-(a, 4-di hydroxy-3-methoxy-benzyl)-4-(4-hydroxy-3-methoxy-benzyl) Tetrahydrofuran, N-trans-feruloyltyramine as diacetate, Giloin. (22) |
Discussion and Conclusion

In this review, mentioned herbals are being prescribed for acute respiratory infectious diseases and other chronic respiratory diseases in Siddha System of Medicine from ancient times. They are also indicated for various ailments. Studies proven the anti-bacterial, anti-viral and other anti-microbial effects against various microbes of these Siddha herbals. Most of these herbals having anti-pyretic, anti-inflammatory and antioxidant effects which were proved through various studies. Some herbals in guideline have specific effects on Asthma and other respiratory diseases. Moreover, all the herbs are having good effect on Diabetes. And they are prescribed for neurological, cardio vascular, Gastro intestinal, excretory, and Genito urinary diseases and effect in the systems also were proven in research studies.

The Siddha formulations mentioned in the ‘Guidelines for Siddha Practitioners for COVID 19’ are Kabasura Kudineer Chooranam, Nilavembu Kudineer Chooranam, Nellikkai legiyam, Manjal – Curcuma longa, Elumitchai – Citrus limonia, Vembu – Azadirachta indica.

| Herbal                  | Ingredients                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------------------|
| Manjal – Curcuma longa  | 1,8-cineole, 2-bornanol, 2-hydroxymethyl-anthaquinone, 4-hydroxybisabola, 10-diene-9-one; 4-methoxy-5-hydroxybisabola; 4-hydroxy-cinnamoyl- (Feruloyl)-methane, Alpha-atlantone, Alphinine, Alphaterpineol, Ar-turmerone, Arabinose. Ascorbic-acid, Ash, Azelene, Betacarotene, Beta-pinene, Betasiquiphellandrene, Bis-(Para-hydroxycinnamoyl)-methane. Bis-desmethoxycurcumin, Bisabolene, Bixin, Borneol, Bornon, Caffeic-acid, Calcium, Caprylic-acid, Caryophyllene, Chromium, Cineole, Cinnamic-acid, Cuminyl-alcohol, Curcumene, Curcumenol, Curcumin, Curdione, Cobalt, Copper. Eugenol, Epiprocurnecol; Eucalyptol; Eugenol; Feruloyl-p-coumaroyl-methane, Gamma-atlantone, Germacrone, Germacrone13-al; Guaiacol, Isoborneol, L-alphacurcumene. L-beta-curcumene, Limonene, Manganese, Monodesmethoxycurcumin, Nicin, Nickel, norbixin; Ocumaric-acid, P-coumaric-acid, P-methoxycinamic-acid, Pcmene, Ptolymethylcarbinol, Phosphorus, Protocatechuic-acid, Procurnecadiol. Acidic polysaccharides: utonan A, B, C, D. Other chemicals compound are copper/zinc, campesterol, stigmasterol, betasitosterol, cholesterol, fatty acids and metallic elements potassium, sodium, magnesium, calcium, manganese. Iron. (23) |
| Elumitchai – Citrus limonia | Citronellal (29.31%), Limonene (17.59%),(E)-citral (12.71%), 1,6-octadien-3-ol,3,7-dimethyl (10.91%), biocyclo [3.1.0] hexane, 4-mehylene-1-(1-methyl) (8.80 %), 6-octen-1-ol,3,7-dimethyl (7.95%), 2,6-octadien-1-ol,3,7-dimethyl-acetate (Z) (6.29%), 1,3-cyclohexadiene,5-(1,5-dimethyl-4-hexenyl)-2-methyl, [S(R,S)] (2.81%), cyclohexene,3-(1,5-dimethyl-4-hexenyl)-6-methylen-, [S-(R,S)](1.64 %), bezene,1-(1,5-dimethyl-4-hexenyl)-4-methyl (1.10 %) and cyclohexene,1-methyl-4-(5-methyl-1-methyl-1-methyle-4-hexenyl)-(s) (0.88 %) Flavanones (Eriocitrin 16.7%, Hesperidin 20.5%); Flavones (6,8-di-C-GluApigenin1.17%, 6,8-di-C-Glu-Diotsemetin 4.95%, 7-O-Rut-Luteolin 3.93%, Dionsin 3.12%), Aglycones (Luteolin 0.08%). Cousains and Psoralens: (Bergapten, Bergamottin, Byakangelicin, Citropten, Imperatorin, Isoimperatorin, Isoimpepinellin, phellpterin, Prangol, Scoparon, Scopeletin, Umbelliferone, Umbelliprenin, Xanthyletin). Carotenoids: (Phytofluene, β-caroteine, Cryptoxanthin, Violaxanthin, Auroxanthin). (24) |
| Vembu – Azadirachta indica | Azadirachtin and the others are Nimbolinin, Nimbin, Nimbidin, Nimbidol, Sodium nimbinate, Gedunin, Salannin, and Quercetin. Leaves contain ingredients such as Nimbin, Nimbannan, 6-desacetyl-7-benzoyladiradione, 7-desacetyl-7-benzoylgedunin, 17-hydroxyazadiradione, and nimbiol. Quercetin and β-sitosterol, polyphenolic flavonoids, were purified from neem fresh leaves. Seeds hold valuable constituents including Gedunin and Azadirachtin (25) |

The Siddha formulations mentioned in the ‘Guidelines for Siddha Practitioners for COVID 19’ are Kabasura Kudineer Chooranam, Nilavembu Kudineer Chooranam, Nellikkai legiyam, Amukkara Chooranam, Thalisadhi Chooranam, Adhimadura Chooranam, Thippili Rasayanam, Notchi Kudineer Chooranam, Vishasura Kudineer Chooranam. They are highly used in the Covid care centers of South India indicating possible effects at present and some clinical trials are going on such siddha medicines. Most of these 12 herbals are as one of the ingredients of the above-mentioned preparations.

Anti-viral activity of these herbals against COVID 19 is not established yet, anyway the Pharmacological review these herbals indicates that they may be suitable for the treatment of COVID 19 disease even with co morbidity conditions because all
the herbals are having good effects on Respiratory system as well as other systems. Proper combination of herbs for activity study against current viral infection may help to prepare the healthcare to prepare against any health-related issues. The creation of awareness is very important among all people regarding prevention of Covid-19 infection.
