Supplement Figure. 1 ROC curve of the nomogram in the Validation cohort. A: The AUC in 3-years for OS was 0.819 and 5-years was 0.789 in the Training cohort. B: The AUC in 3-years for CSS was 0.817 and 5-years was 0.786 in the Training cohort. C: Calibration curves of the nomograms for OS. D: Calibration curves of the nomograms for CSS.
Supplement Figure 2 Kaplan–Meier curves of Validation cohort. The survival curve is drawn by the score calculated by the nomograph in the Validation cohort: OS (A) and CSS (B); In Luminal A subtype, the survival curve was drawn by the score calculated by nomograph: OS (C) and CSS (D); In Luminal B subtype, the survival curve was drawn by the score calculated by nomograph: OS (E) and CSS (F); In HER2 enriched subtype, the survival curve was drawn by the score calculated by nomograph: OS (G) and CSS (H); In Triple Negative subtype, the survival curve was drawn by the score calculated by nomograph: OS (I) and CSS (J).
