Abstract— In this case the researcher's rationale Knowing the stages of the process carried out by recruiting athletes at the training and training center (PPLP) of North Sumatra and planning programs at the training and training center in North Sumatra, facilities and infrastructure needed by athletes to help the training needs of student athletes, know the implementation of financial management in PPLP North Sumatra. This research was carried out at the North Sumatra Student Development and Training Center. The research was conducted in December 2019. This product is expected to provide convenience and keenness in seeing the results of recruitment of PPLP athletes. The method used in this research is Descriptive Research which is describing the implementation of management in the training center of student training in North Sumatra can be interpreted as a problem solving procedure that was investigated by describing Data sources in this study were obtained from PPLP athletes. The population in this study were athletes training and sports center students who are members of every sport in North Sumatra PPLP. From the results of tests conducted on athletes who are members of sports in North Sumatra PPLP interviews will be conducted to find out information, the process of recruiting athletes and carrying out management by means of data collection techniques, interview guidelines, documentation, triangulation. The conclusion is The facilities and infrastructure needed are in accordance with the needs of the student athlete. Managers, coaches, athletes can maximize and streamline the available advice and can use the tools according to the needs of PPLP students. The implementation of financial management has been running as it should.

Keywords: management, centers and training, students

I. INTRODUCTION

Sports coaching through training among teachers is a surefire strategy to rebuild past glory in the field of achievement by sport. PPLP is a center for education and student training a government program that is packaged with the aim of developing long-term sporting achievements which is expected to be a networking tool for fostering talented young athletes who become the axis and center for looking for outstanding athletes. This study aims to recruit athletes in the stages of the recruitment process at the training coaching center and program planning at the training center and sports training to find out the facilities and infrastructure needed in accordance with the needs of student athletes, knowing the implementation of PPLP financial management.

Teachers as educators must try to develop their competencies in order to achieve educational goals [1]. Physical education in its understanding is a process of education utilize physical activity to produce holistic changes in individual qualities, both in terms of physical, mental, and emotional. Education the body treats the child as a whole, total being, rather than just think of it as someone who is separate physical and quality mentally [2]. Schools are one place in shaping character [3]. On the other hand that training activities are a fundamental factor if you want to get the peak performance. This condition forces anyone who wishes to do performance training exercises to understand the training procedures themselves in order to achieve the expected goals [4]. Education is a basic need of every human being to ensure his life to be more dignified [5]. Improving the quality of human resources is a serious problem from every country including Indonesia [6].

In this case the researcher's rationale Knowing the stages of the process carried out by recruiting athletes at the training and training center (PPLP) of North Sumatra and planning programs at the training and training center in North Sumatra, facilities and infrastructure needed by athletes to help the training needs of student athletes, know the implementation of financial management in PPLP North Sumatra. The principles of practice guiding for the purpose of exercise can be achieved, among other things: 1) the principle of readiness, 2) individual, 3) adaptation, 4) load, 5) progressive, 6) specific, 7) variations, 8) heating and

cooling, 9) a long-term exercise, 10) the principle of contrast, 11) is not excessive, and 12) systematically [7].

II. METHODS

The method used in this research is Descriptive Research which is describing the implementation of management in the training center of student training in North Sumatra can be interpreted as a problem solving procedure that was investigated by describing Data sources in this study were obtained from PPLP athletes. The population in this study were athletes training and sports center students who are members of every sport in North Sumatra PPLP. In qualitative research, which became the instrument or tool is the researcher's own research. Data collection techniques used in qualitative research was conducted in the state of nature, the source of primary data and more data collection on participating observation (participant observation), In-depth interviews (in-depth interviews), documentation and field notes[8], [9].

III. DISCUSSION

From the results of tests conducted on athletes who are members of sports in North Sumatra PPLP interviews will be conducted to find out information, the process of recruiting athletes and carrying out management by means of data collection techniques, interview guidelines, documentation, triangulation.

IV. CONCLUSIONS

The implementation of the stages of the process carried out in the recruitment of athletes at the training center and student sports training (PPLP) of North Sumatra has been going well with the monitoring of athletes in each city and district level POPDA championship, as evidenced by the results obtained by North Sumatra PPLP athletes from the year to the year increased by the title of overall champion. Program planning at the North Sumatra Student Sports Training and Training Center (PPLP) is as expected by KEMENPORA, based on the findings above, it can be illustrated that the implementation of program planning at the North Sumatra Student Sports Guidance and Training Center is already going well, already demonstrating the achievement of targets as expected by KEMENPORA namely the establishment of a training center and student sports training (PPLP) is one alternative to fostering and developing sportsmen potential talented students and high interest in sports to be developed in order to achieve the optimal performance both as regional sportsmen representing the regions and becoming one of the supports of national sportsmen to represent the nation and state in international sporting events. The facilities and infrastructure needed are in accordance with the needs of the student athlete. Managers, coaches, athletes can maximize and streamline the available advice and can use the tools according to the needs of PPLP students. The implementation of financial management has been running as it should.
