Dear Editors:

I am writing to resubmit our revised manuscript entitled “Documentation of body mass index and control of associated risk factors in a large primary care network” for review. I have revised my paper in light of the core pre-accept revisions requested, and am providing a point-by-point description of the changes made.

Major revisions:

- Author list: The author list has been changed in the manuscript to the appropriate style similar to as written in the submission system.
- Affiliations: The affiliations for each author have been written in full.
- Abstract: The abstract has been changed in the submission system to reflect changes made in the manuscript.
- Additional files: We have removed all additional files with the exception of the figure.

Minor revisions:

- Title: The title has been changed to sentence case.
- Qualifications: The authors' qualifications have been removed from the manuscript and submissions system.
- Email address: Email addresses for each author have been added to the title page, in the format requested.
- Abbreviations: The abbreviations have been placed after the conclusions section and have been re-formatted to paragraph form as requested.
- Abstract sections: The "Results and Discussion" section has been renamed "Results" both in the manuscript and on the submission system.
- Funding Source and Disclosure: This section has been deleted and the information moved into the Acknowledgements section.
- Competing interests: We have included a “Competing interests” section between the Conclusions and Authors contributions.
- Figures: We have deleted the figure from the manuscript file and uploaded it as a separate figure file using the “upload” form on the submission system. In the figure file, we did not include the title or the figure number. The legend and title are part of the manuscript file, given after the reference list. We have changed the manuscript to refer to the figure as Figure 1 both in the figure legend as well as in the body of the manuscript.
- Reference 16: We have verified that the link to the website in Reference #16 is functioning.
• Typography: We have reviewed the manuscript for any typographical errors and to make any final corrections or revisions.

Thank you again to the reviewers and the Associate Editor for their thoughtful comments. We are very excited about the opportunity to publish our paper in your journal. Please let us know if you have any other questions. We look forward to hearing from you.

Sincerely,

Stephanie A. Rose
