Supplementary Figure S3. Diagnostic plots of observed versus predicted $\Delta$QTcF.

Each point represents a value of $\Delta$QTcF. Clinical observations are shown in the upper panel, individual predictions are shown in the lower panel, colored by treatment. Data from placebo are shown in red; data from glasdegib are shown in blue. Red dotted line indicates line of unity; black line indicates linear regression. $\Delta$QTcF, change from baseline in QT interval corrected for heart rate using Fridericia's formula.
