Supplemental table 1: Overarching Themes for Geriatric Healthcare Professionals Caring for Older Adults

| Theme                                                                 | Description                                                                                     |
|----------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Preserving socialization while physically distancing;                |                                                                                                |
| Importance of healthy systems – neighborhoods, extended families,   |                                                                                                |
| medical homes;                                                      |                                                                                                |
| The growing importance of technology and computer skills for        |                                                                                                |
| older adults to maintain connection;                                |                                                                                                |
| Reinforcement of geriatric principles (e.g., minimize frailty,      |                                                                                                |
| optimize resilience), need to enhance social support and care       |                                                                                                |
| networks, advance care planning, balancing risks and benefits of a  |                                                                                                |
| given intervention, and focus on cognitive and physical function     |                                                                                                |
| and QOL;                                                            |                                                                                                |
| Evaluate and incorporate social determinants of health in guidance   |                                                                                                |
