ABSTRACT: The phenomenon of moral decadence is a topic that never dims. Like an endless sea, problem after problems related to the moral decline of the nation's children continues to roll over time. Religious education has an important role in overcoming moral problems that never end. Hadith as the basis of the second Islamic law certainly has a very basic position in Islamic education. Among the thousands of hadiths in the Islamic books, there are 40 hadith selected by Imam Nawawi, then collected in a book called al-arba‘in al-nawawiyah. The book al-arba‘in al-nawawiyah received an extraordinary reception from all corners of the world, even the book became a mandatory lesson in Indonesian Islamic Boarding Schools in general. The development of the times brought its challenges in moral matters, especially for the millennial generation. Presumably, the actualization and contextualization of moral values in the book needs to be done. So that found moral values that are relevant to the times. In the end, moral values can easily be understood and practiced. And after researching the study of literature from various related references, the authors find that there are moral values that are relevant for overcoming the problem of decadence that is increasingly afflicting. So it is proper for moral studies to be found in the book of al-arba‘in al-nawawiyah to be studied not only in pesantren but also in other formal and informal institutions.
mudah dapat dipahami dan diamalkan. Dan setelah dilakukan penelitian melalui study pustaka dari berbagai rujukan yang terkait, penulis menemukan bahwa terdapat nilai nilai moral yang relevan untuk menanggulangi masalah dekadensi yang kian melanda. Maka sudah selayaknya kajian kajian moral yang terdapat dalam kitab al-arbain al-nawawiyah untuk dipelajari tidak hanya dipesantren tetapi juga di lembaga formal dan informal lainnya.

**I. INTRODUCTION**

Talking about moral decadence is a discussion that never goes out of style. Like an endless sea, even a problem after problem new problems keeps coming in as time goes by. Recently viral news about a case of bullying carried out by several young men against a 12-year-old child seller of fried food (Wahyu Ardianti Woro Seto, 2020). Though news recently spread about the murder of a toddler committed by a 15-year-old child, and it was by Deputy Chairman of the Indonesian Ulema Council (MUI) Advisory Council Didin Hafidhudson was seen as a warning of the lack of religious education (“Remaja Bunuh Balita, Didin: Warning Pendidikan Agama,” 2020) and after the case was revealed, it turned out that there were other cases of crime that had befallen the perpetrators, the perpetrators turned out to be victims of sexual abuse committed by three of his closest people (Velarosdela, 2020), previously there was also news of a case of torturing a cat to death, (Rosidin, 2019) whereas in a hadith the prophet is told that there was a woman who went to hell because she killed a cat (Hanbal, 2001).

A study with the theme of the Relationship Between Religiosity and Morality of Youth concluded that the existence of religiosity dramatically affects one's morality, a less religious person is more likely to act immorally (Remaja, Madrasah, Ma, & Reza, 2013). Of course, this conclusion does not only apply to adolescents but applies in general to both young and old, as the opinion of majority scholars that "Ibrah applies in general, not specifically to the perpetrators or related causes" (Al-Maqdisi, 2002).

Besides, research conducted by Idrus Ruslan, about development carried out in Indonesia in the form of physical or non-physical (mental). Concludes, that the religious spirit embedded in Pancasila is following the spirit that exists in the teachings of Islam both in the Koran and Hadith (Ruslan, 2013).

Talking about Islamic law, it is certainly inseparable from the discussion of the hadith. Because the hadith is the second basis of Islamic law after al Qu'ran (Al-Maliki, n.d.). While the definition of hadith is all matters relating to the Prophet, or companions, or tabiin, whether in the form of words, deeds, approval, or nature (Al-Maliki, n.d.). And among the books of hadith, the most recognized its validity is the book of Sahih Bukhari (Al-Maliki, n.d.). But even so does not deny the books of the other hadith, even according to the agreement of scholars of hadith experts, that the Da'eef hadith can still be used as the basis of the virtues of a charity with 3 conditions; not excessively *dha’if*, regardless of the path of history of people suspected of lying, is still based on a global proposition (Al-Iid, 2003).
So great was the attention of scholars about the science of hadith, that we witness that in addition to the large books containing thousands of hadith, there are also books that contain only 40 hadiths. Imam Nawawi is a scholar of the many scholars who wrote the book containing 40 hadiths, in the future referred to like the book "al-Arbain al-Nawawiyah". Limiting the number of hadiths to 40 is certainly not without cause, but there is an encouragement to disseminate the hadith and to be easily learned and easily memorized (Al-Dhimyati, 1998). Even though there is also a hadith that contains the virtues and suggestions for memorizing 40 prophetic hadiths, but the hadith is stated as a hadith *dha'if* (Al-Haitami, 2008). On the other hand, to instill the value of moral content in the hadith more broadly and deeply, the actualization and contextualization of the hadith are very important along with the times (Suryadilaga, 2017).

Although many researchers discuss the book of *al-arbain al-nawawiyah*, it is still rare to review the conflict with morals, plus many writings that are too long and deep, it requires a brief, concise and straightforward review. Following the above reasons, the author is encouraged to research moral values in the book *al-Arbain al-Nawawiyah*, and their relevance in answering the discussion of moral decadence that continues to roll in this beloved country, as well as being strengthened and added to the expected literature (Ikhwan, 2017).

II. LITERATURE REVIEW

Moral in terms of its native language, the word mores, means "the rules of decency" if translated into English comes to the moral word meaning standards of behavior or principles of right and wrong (Hornby & Cowie, 1995). In Greek, the word ethos has almost the same meaning, and henceforth is known as ethics (Puspoprodjo, 1999). Whereas in Arabic the word akhlâq has the purpose of character or customs (Sidiq, 2019). In Indonesian, several word terms have a meaning related to morals, such as morality, character, personality. If the word is referred to as a person's attribute, then what is meant is related to moral issues. But the word that is often used to represent morality is ethics (Sahmiar, 2011).

In real life, decency is often translated as instructions for behaving politely, and not obscene. So, morality is a rule of decency which includes all norms for good conduct and behavior (Gunawan Setiardja, 1990). Especially for adolescents, which is a period of a human life journey that has experienced the most change. that's why in adolescence there may be a lot of shock and uncertainty in themselves (Hanif & Mutakin, 2019). On the other hand, excessive physical development and energy during adolescence are one of the reasons their behavior seems to be less polite, rude, and awkward (Kartono, 1995).

According to Al-Ghazali. Moral values in Islam can not be separated from the four main principles, namely (Al-Ghazali, 1986):

1. Wisdom, knowledge competence to establish the best choices in thinking, acting, and acting.
2. *'Adalah*, mental abilities in conditioning and directing lust and emotions in objective truth
3. *'Ifrah*, an energetic attitude towards not falling into pragmatic and hedonic actions.
4. *Syajâ'ah*, courageous attitude in carrying out duties and obligations by using reason and morals.
These four principles are the moral basis for controlling the conscience of the heart, and which can ultimately affect behavior.

While the method of moral internalization according to Mustafa al-thahan can be done in several ways, namely: (1) al-Qudwah (Exemplary), (2) al-Taujīh wa al-Mau'ızah (Guidance and Advice), (3) al-Hiwar wa al Mas'alah (Dialogue and Questions and Answers), (4) al-Hadats (Stories / Events), (5) Ihyā al-Damīr (Soul Awakening / Motivation). (6) al-Targhīb (Reward) wa al-Tarhīb (Punishment) (Al-Tahhan, 2009).

According to Allen and Ryan, in dialogue an educator must apply several tricks or tricks, namely: a) Probing questions; meaning tracking questions, i.e. using follow-up questions to deepen or to further explore the answers needed from students, b) Higher-order questions; or follow-up questions, i.e. follow-up questions that are asked to students to improve learning abilities more analytically and comprehensively, c) Divergent questions; namely different questions, skills to raise different forms of questions on an issue that wants to be asked (Sukirman, 2012). According to Abdul Muhid, punishment should only be done if it is felt to be very urgent and there is no other way (Muhid, Asnawi, & S. A. P., 2018).

III. METHOD

This research is library research (library research), which is research that seeks to obtain data using library sources (Ikhwan, 2013). The data that is the center of this study are collected through variable data that relies on the writings, thoughts, and opinions of figures and experts who talk about the main research theme (Sugiono, 2017). While the subject is the hadith contained in the book of al-Arbain al-Nawawiyah. The hadiths which are the subject of research are those related to morals in the book of al-Arbain al-Nawawiyah. The process of collecting data is done by identifying the hadith related to morals, then analyzed with a qualitative data analysis model.

IV. RESULT AND DISCUSSION

The Book of Al-Arbain Nawawiyah and Imam Nawawi

1. Biography of Imam Nawawi

His full name is Yahya Ibn Syaraf Ibn Muri bin Hasan Ibn Husain Ibn Muhammad Ibn Jum'ah Ibn Hizam. (Al-Haitami, 2008) He was nicknamed Abu Zakaria because he was named Yahya. As is the custom of the Arabs to call a person named Yahya with the nickname ashes of Zechariah, because the Prophet Yahya is the son of the prophet Zachariah, in the hope that they can imitate both. While Al-Hizami is lean back to his grandfather named hizam (Farid, 2007).

An-Nawawi's nickname is because he is from the village of Nawa. He was also nicknamed Muhyiddin because he enlivened the Shafi'i madhzab with his written works. He was born in the month of Muharram in 630 or 631 AH in the village of Nawa, a village in the Damascus Region (Al-Dhimyati, 1998). Imam Nawawi is known as a scholar of zuhud, and wara', he fasts a lot in his daily life (Ikhwan, 2019).

He is a figure of a highly productive cleric, this is evidenced by the many of his works as follows (Farid, 2007):
1) Field of Hadith: a) Al-Irsyay ila bayan Al-Asma 'Al-Mubhamat, b) Al-Adzkar, c) Al-Irshad, d) Syarah Saheeh Al-Bukhari, f) Syarah Shohih Muslim, g) Al-Arbain al-Nawawiyyah, h) At-Taqrib, i) Khulasah Al-Ahkam min Muhimmat Al-Sunan wa Qawa'id Al-Islam, j) Riyadh al-Saliheen.

2) Fiqh Field: a) Al-Idhah, b) Al-Minhaj, c) Al-Majmu 'Syarah Al-Muhadzab, d) At-Tahqiq, e) Raudh Ath-Thalibin.

3) Education and Ethics: a) Bustan Al-Arifin, b) Tibyan fi Adab Hamalah Al-Qur'an.

4) Biography and Language: a) Thabaqat Al-Fuqaha', b) Tahdzib Al-Asma 'wa Al-Lughat, c) Tahrir At-Tanbih.

2. Al-Arbain Al-Nawawiyyah Book

Al-arbain in language means 40, while al-nawawiyyah is a response to Imam Nawawi, which means al-arbain al-nawawiyyah book is a book containing 40 hadith compiled by Imam Nawawi. Even though the total number of hadiths in the book is 42 traditions. But that becomes commonplace because there is a rule "the number cannot be ascertained with a certain amount" as the opinion of Abu shama al-Maqdisi (Al-Thawil, 1985).

Many scholars are so interested in the book of al-Arbain al-Nawawiyyah, that there appears various sharia which explains the contents of the book (Al-Dhimyat, 1998). There were even more than 40 scholars written in the form of syarh and hasyiyyah al-Arbain al-Nawawiyyah (Al-Haitami, 2008). This book is one of the basic curricula on Islamic boarding schools in Indonesia in general. (Stiawan & Tohirin, 2015) One of the highlights of the book al-Arbain al-Nawawiyyah is that it turns out that there is also a value in the value of Islamic education, namely: the value of worship, the amount of Ihsan and the value of da'wah (Tantowi, 2018). Another unique thing in the book of al-Arbain al-Nawawiyyah also there is the formation and meaning of command words that have intrinsic and majazi meaning, thus increasing the treasury of Arabic literature when studying it (Anwar, 2016).

Al-Arbain al-Nawawiyyah Book is a book that is very phenomenal and popular in the Islamic community, especially for the Indonesian Islamic society. Even the book has been translated into various languages, including Indonesian. For the people of Indonesia, it is also very easy to get the book, because both the book and its translation are printed not just one printing press. Then the possibility of people who do not understand the book al-Arbain al-Nawawiyyah is due to a lack of motivation and motivation to read and study it (Matlekat, 2019).

Along with the development of increasingly sophisticated technology, the book al-Arbain al-Nawawiyyah also has made many digital versions with an attractive interface, so that every smartphone user can access easily (Muhammad Afif Effindi & Nur Alifah, 2015). Among them are E-Hadits based on Java Eclipse (Rakhmah, 2016). Their fact there is also the design of the book Syarh al-Arbain al-Nawawiyyah with the Knuth Morris Pratt (KMP) string matching method. The use of the Knuth Morris Pratt method is intended to facilitate the search for content and topics to be searched. So it's easier to learn it. The search model used in KMP uses pattern matching between keyword patterns and patterns in the text. But unfortunately, the application was formed using the Java programming language based on desktop and can only be operated on computers that use the Windows OS (Wahyono, 2017).

The efforts made by Syamsul Rizal and Anna Mukhayaroh also should be appreciated, related to the making of an interactive application that includes the book al-Arbain al-Nawawiyah. The app displays an interactive audiovisual animation stimulating and motivating students to memorize the hadith 'Arbain (Rizal & Mukhayaroh, 2018).

3. Moral Value in the Book of Al-Arbain Nawawiyah

Among the popular hadiths that form the basis for moral cultivation in the book of al-arbain al-nawawiyah is the second order of hadith about the meaning of Ihsan; "Gabriel asked: explain to me about the meaning of Ihsan?, The Prophet replied: Ihsan is that you should worship Allah as if you would see it, even though you cannot see it, indeed he sees you" al-Ghazali explains that ihsân includes three elements of inner awareness namely (Al-Ghazali, 1986):

First, a sensitive theological feeling and closeness to God. It was divided into 2 levels; Musyahadah and Muraqabah. Musyahadah is a position where a servant kneels before God and he can witness with his inner eyes that God is real. While muraqabah is the position of a servant kneeling before God but his inner eye cannot see his whereabouts, but he believes in his presence and supervision at all times.

Second, a sense of caring about social conditions, which starts from the scope of the family to the relationship with all the creatures of God that is wider. Allah SWT said:

"Worship Allah and do not associate Him with anything. And do good to two parents, close relatives, orphans, poor people, close neighbors and distant neighbors, distant friends, peers, ibn sabil, and your servants. Surely Allah does not like people who are arrogant and proud of themselves "(Surah An-Nisa’ : 36).

Third, a strong mentality, so that he will be patient when he gets a disaster, and be brave in living a hard life. Each can be observed from the following words of Allah SWT:

"Indeed, we give back to those who do good". (Surah As-Saffat: 80)

Hadith sequence number 24 in the book al-Arbain al-Nawawiyah about the prohibition of wrongdoing is also a strong foundation related to the issue of moral urgency in Islam. As the following text:

"O my servant, in truth, I have forbidden tyranny over myself and I have made it forbidden to you. Therefore, do not do wrong to one another "(Muslim HR)

All things that are contrary to the norm that should be is tyranny (Al-Thabari, 2001). So the practice of behavior that deviates from the way that should be strictly prohibited in Islam. In other words, all human actions and behavior must be following applicable morals and norms. As Ahmad Syauqi’s statement is very popular "truly the nation will remain victorious as long as they still have morals, if their morals are gone, then the nation will disappear" (Al-Mahdi, 2009).

The urgency of this character is also the main mission of the Prophet Muhammad as he said:

" I was sent (Allah) to perfect good character" (HR Ahmad)(Hanbal, 2001)

To fully understand the content of moral values contained in the book of Al-Arbain Al-Nawawiyah, the authors conclude the following points:

Table 1.

The Challenge of Moral Decadence – Ahmad Zamil Umam & Abdul Muhid

The points above certainly do not represent the whole meaning and value of the hadith itself, maybe even there are still many meanings and values that have not been revealed. Nevertheless, from the table above, at least it can be understood that in every hadith from the book al-arbain al-nawawiyah there are relevant moral values. If these values are taught and applied in formal or informal institutions, or even at the level of society in general, it certainly can be part of an effective solution to answer various problems of moral decadence that are increasingly endemic.

V. CONCLUSION

Religiosity is very influential on a person's good effects, so among the efforts to overcome moral decadence is a religious approach. One such religious approach is the approach with the hadith of the prophet Muhammad, especially the hadith contained in the book al-arba’in al-nawawiyah. al-arba’in al-nawawiyah book is a monumental work of a world-renowned scholar, Imam Nawawi. In addition to being known as a zuhud scholar and fasting expert, he is also a prolific scholar with his writings. So do not be surprised if the book al-arba’in al-nawawiyah into a famous book in the world, even many attention and re-translated by dozens of scholars after his death.

Kharisma Kitab al-arba’in al-nawawiyah also sticks out in Indonesia, it is known that the book becomes a basic curriculum that must be studied in Indonesian Islamic boarding school in general. efforts to study continue today in the millennial era. So efforts to spread the understanding of the book are increasingly massive, including through Android applications and Windows software. Of course, in modern times such as the current understanding and meaning of the hadith needs to be actualized so that it can give a more striking picture, especially for millennials.

Among the efforts to reactivate the hadith is to study al-arba’in al-nawawiyah in terms of psychology, especially morals. Researchers found moral values which were then poured into short, concise, and straightforward language. If these values are taught and applied in formal or informal institutions, or even at the level of society in general, it certainly can be part of an effective solution to answer various problems of moral decadence that are increasingly endemic.
