A corrigendum on

Task-dependency and structure-dependency in number interference effects in sentence comprehension
by Franck, J., Colonna, S., and Rizzi, L. (2015). Front. Psychol. 6:349. doi: 10.3389/fpsyg.2015.00349

The reference of the following sentence should be Adani et al. (2014) rather than Adani (unpublished).

“Adani et al. (2010) and Adani (unpublished) found that both English and Italian speaking children showed better performance in a sentence-picture matching task when the object and the subject of the object relative clause mismatched in number (e.g., Show me the elephant that the lions are washing is better understood than Show me the lion that the elephant is washing).”

Adani et al. (2014) should thus be added to the References.
