Table S7: Multiple linear regression analysis using 6-month postoperative visual acuity as the dependent variable and propensity score and tamponade substance as independent variables.

|                  | Coefficients | Standard Error | p value |
|------------------|--------------|----------------|---------|
| Silikone Oil     | 0.285        | 0.051          | <0.001  |
| Propensity score | 1.188        | 0.097          | <0.001  |
