Summary of PhD thesis

A grammar of Papuan Malay

ANGELA KLUGE

PhD Public Examination, 3 June 2014
PhD in Linguistics
Promoter: Prof. Dr. M.P.G.M. Mous
Co-promoter: Dr. M.A.F. Klamer
Leiden University

This contribution summarizes Kluge’s (2014) *A grammar of Papuan Malay*, an in-depth linguistic description of one Papuan Malay variety. This study is based on sixteen hours of recordings of spontaneous narratives and conversations between Papuan Malay speakers, recorded from a sample of about 60 different Papuan Malay speakers; in addition, an extended word list was recorded.

“Papuan Malay” refers to the easternmost varieties of Malay; they belong to the Malayic sub-branch within the Western-Malayo-Polynesian branch of the Austronesian language family. The Papuan Malay varieties are spoken in the coastal areas of West Papua, the western part of the island of New Guinea. The variety described here is spoken in the Sarmi area, which is located about 300 km west of Jayapura. Both towns are situated on the northeast coast of West Papua (see Map 1).

Papuan Malay is the language of wider communication and the first or second language for an ever-increasing number of people of the area; the

---

2 Angela Kluge (2014, Utrecht: LOT).
number of speakers is estimated to be by about 1,100,000 or 1,200,000. While Papuan Malay is not officially recognized, and therefore not used in formal government or educational settings or for religious preaching, it is used in all other domains, including unofficial use in formal settings, and, to some extent, in the public media.

After a general introduction to the language, its setting and its history, Kluge (2014) discusses the following topics, building up from smaller grammatical constituents to larger ones: phonology, word formation, noun and prepositional phrases, verbal and nonverbal clauses, non-declarative clauses, and conjunctions and constituent combining. Of special interest to linguists, typologists and Malay specialists are the following in-depth analyses and descriptions: affixation and its productivity across domains of language choice, reduplication and its *gesammtbedeutung*, personal pronouns and their adnominal uses, demonstratives and locatives and their extended uses, and adnominal possessive relations and their non-canonical uses.

Kluge’s (2014) study provides a point of comparison for further studies in other (Papuan) Malay varieties and a starting point for Papuan Malay language development efforts.

In the following the chapters of Kluge’s (2014) study are briefly summarized, followed in the Appendices by a sample of three texts. Chapter 1 provides an introduction to Papuan Malay. After general background information about the language in terms of its larger geographical and linguistic settings and its speakers, the history of the language is summarized. Next, the classification
of Papuan Malay and its dialects are discussed, followed by descriptions of its typological and its sociolinguistic profile. Previous research on Papuan Malay is summarized next, followed by a brief overview of available materials in Papuan Malay. The final section of this introductory chapter describes methodological aspects of the study.

Chapter 2 examines the phonology of Papuan Malay. The language has eighteen consonant phonemes and a basic five-vowel system. The consonant system consists of six stops, two affricates, two fricatives, four nasals, two liquids, and two approximants. The vowel system includes two front and two back vowels, and one open central vowel. Papuan Malay shows a clear preference for disyllabic roots and for CV and CVC syllables; the maximal syllable is CCVC. Stress typically falls on the penultimate syllable, although lexical roots with ultimate stress are also attested.

Chapter 3 and Chapter 4 discuss word formation processes in Papuan Malay. The language has very little productive morphology. Word formation is limited to the two derivational processes of affixation (Chapter 3) and reduplication (Chapter 4). Inflectional morphology is lacking, as nouns and verbs are not marked for any grammatical category such as gender, number, or case. There is also no voice system on verbs. Reduplication in Papuan Malay is a very productive morphological device for deriving new words. In terms of lexeme formation, three different types of reduplication are attested: full, partial, and imitative reduplication. The most common type is full reduplication, which involves the repetition of an entire root, stem, or word; bound morphemes are not reduplicated. Full reduplication usually applies to content words, although some function words can also be reduplicated. Partial and imitative reduplication are rare. The gesamtbedeutung of reduplication is “a higher/lower degree of […]” in the sense of augmentation and diminution. There is, however, no specific, one-to-one relation between the meaning aspects of the reduplicated lexemes and the syntactic class of the corresponding base words. Affixation in Papuan Malay has very limited productivity. This conclusion is based on an investigation of six affixes. Given the sociolinguistic profile of Papuan Malay (substantial language contact between Papuan Malay and Indonesian with both languages being in a diglossic distribution, ambivalent language attitudes toward Papuan Malay, and lack of language awareness) no productivity testing was conducted, as a substantial amount of interference from Indonesian was expected. This interference would have skewed testees’ naïve judgments. Instead, the six affixes were examined in terms of seven language internal and three language external factors considered relevant in establishing the degree of productivity of these affixes. Compounding (Chapter 3) is a third word-formation process; it remains uncertain, however, to what degree it is a productive process.

Chapter 5 discusses the Papuan Malay word classes. The main criteria for defining distinct word classes are their syntactic properties, due to the lack of inflectional morphology and the rather limited productivity of derivational patterns. Three open and a number of closed lexical classes can be
distinguished. The open word classes are nouns, verbs, and adverbs. The major closed word classes are personal pronouns, interrogatives, demonstratives, locatives, numerals, quantifiers, prepositions, and conjunctions. At the same time, however, Papuan Malay has membership overlap between a number of categories, most of which involve verbs. This includes overlap between verbs and nouns which is typical of Malay varieties and other western Austronesian languages. However, nouns, verbs, and adverbs have distinct syntactic properties which warrant their analysis as distinct word classes.

Three word classes are discussed in more detail, namely personal pronouns in Chapter 6 and demonstratives and locatives in Chapter 7. Chapter 6 deals with the Papuan Malay personal pronouns. The pronoun system distinguishes singular and plural numbers and three persons. In addition to signaling the person-number values of their referents they also signal their definiteness. Each pronoun has at least one long and one short form, with the exception of the second person singular pronoun. The use of the long and short forms does not mark grammatical distinctions but represents speaker preferences. The pronouns have pronominal and adnominal uses. In their pronominal uses, the pronouns substitute for noun phrases and designate speech roles. The long and short pronoun forms occur in all syntactic slots within the clause. Pronouns also occur in inclusory conjunction, summary conjunction, and appositional constructions. In their adnominal uses, the pronouns occur in post-head position and function as determiners. That is, signaling definiteness and person-number values, the pronouns allow the unambiguous identification of their referents. As determiners, the pronoun forms of all person-number values are employed, with the exception of the first person singular. “NP PRO” noun phrases with plural personal pronouns have two possible interpretations. With indefinite referents, they have an additive plural reading and with definite referents an associative inclusory reading.

Chapter 7 describes the Papuan Malay demonstratives and locatives. They are deictic expressions that provide orientation to the hearer in the outside world and in the speech situation, in spatial as well as in non-spatial domains. Both deictic systems are distance oriented, in that they signal the relative distance of an entity vis-à-vis a deictic center. At the same time, the two systems differ in a number of respects. They are distinct both in terms of their syntactic characteristics and forms and in terms of their functions. With respect to their syntactic properties, the demonstratives have a wider range of uses (adnominal, pronominal, and adverbial uses) than the locatives. Likewise, in terms of their functions, the demonstratives have a wider range of uses than the locatives. The locative system, by contrast, allows finer semantic distinctions to be made than the demonstrative system, given that the former expresses a three-way deictic contrast, whereas the latter expresses a two-way deictic contrast.

Chapter 8 examines the Papuan Malay noun phrase. The head of a noun phrase is typically a noun or a personal pronoun. Further, although less common, demonstratives, locatives, or interrogatives can also function as
heads. The canonical word order within the noun phrase is HEAD-MODIFIER. Depending on the syntactic properties of the adnominal constituents, though, a MODIFIER-HEAD order is also common. Attested in the present corpus is the co-occurrence of up to three post-head modifiers.

Chapter 9 describes adnominal possessive relations. In Papuan Malay, adnominal possessive constructions consist of two noun phrases linked with the possessive marker punya ‘poss’, such that ‘possessor punya possessum’. Possessive constructions with punya ‘poss’ have a number of different realizations. The possessive marker can be represented with long punya, reduced pu, clitic =p, or a zero morpheme. There are no syntactic or semantic restrictions on the uses of the long and reduced possessive marker forms. By contrast, omission of punya only occurs when the possessive construction expresses inalienable possession of body parts or kinship relations. In addition to signaling adnominal possessive relations between two noun phrases, punya ‘poss’ has a number of derived, non-canonical functions, namely as (1) an emphatic marker of locational relations or relations of association, (2) a marker of beneficiary relations, (3) an attitudinal intensifier or stance, and (4) a ligature in reflexive constructions. The possessor and the possessum can be expressed with different kinds of syntactic constituents, such as lexical nouns, noun phrases, or demonstratives. In addition, personal pronouns can also express the possessor. In non-canonical possessive constructions, verbs can also take the possessor and/or possessum slots. Further, mid-range quantifiers, temporal adverbs, and prepositional phrases can take the possessum slot. In canonical possessive constructions, the possessum can also be omitted. Semantically, the possessor and the possessum can denote human, nonhuman animate, or inanimate referents.

Chapter 10 deals with prepositional phrases in Papuan Malay. They are formed with eleven different prepositions, encoding location in space and time, accompaniment and instruments, goals, benefaction, and comparisons. Prepositional phrases take on different functions within the clause; that is, they can function as peripheral adjuncts, nonverbal predicates, or arguments. They also combine with different types of syntactic constituents, namely nouns, personal pronouns, demonstratives, locatives, and temporal adverbs. The complements of the prepositions take different semantic roles within the clause, depending on the prepositions they are introduced with.

Chapter 11 discusses verbal clauses in Papuan Malay. The most pertinent distinction is that between intransitive and transitive clauses. There is no one-to-one correspondence between valency and transitivity, however, as Papuan Malay verbs allow but do not require core arguments. Trivalent verbs most often occur in monotransitive or intransitive clauses rather than in ditransitive clauses. Along similar lines, bivalent verbs are very commonly used in intransitive clauses. The predicate typically follows the subject and, in transitive clauses, precedes the direct object. In negated verbal clauses, the negator precedes the predicate. Causative clauses are also very common. They are the result of a valency-increasing operation. Papuan Malay causatives are
monoclausal $V_1V_2$ constructions in which causative $V_1$ encodes the notion of cause while $V_2$ expresses the notion of effect. Papuan Malay has two causative verbs which usually produce causer-controlled causatives: trivalent kasi ‘give’, and bivalent biking ‘make’. While kasi-causatives stress the outcome of the manipulation, biking-causatives focus on the manipulation of circumstances, which leads to the effect. Another common type of verbal clauses are reciprocal clauses, formed with the reciprocity marker baku ‘RECIP’. In these clauses, two predications are presented as one, with two participants equivalently acting upon each other. In simple reciprocals, both participants are encoded as the clausal subject. In discontinuous reciprocals, the second participant is expressed with a comitative phrase. Both clause types typically result in a reduction in syntactic valency. Also discussed are existential clauses formed with the existential verb ada ‘exist’. Two clause types can be distinguished: intransitive clauses with one core argument, and transitive clauses with two core arguments. In one-argument clauses, ada ‘exist’ precedes or follows the subject, or theme, depending on its definiteness. Existential clauses express existence, availability, or possession. A final type of verbal clauses discussed in this chapter are degree-marking and identity-marking comparative clauses. Degree-marking clauses denote superiority, inferiority, or superlative. In these clauses, the parameter follows the index, the comparee takes the subject slot, and the optional standard is expressed in a prepositional phrase. Identity-marking clauses designate similarity or dissimilarity. In these constructions, the parameter either precedes the index or is omitted. The comparee takes the subject slot while the standard is usually expressed with a prepositional phrase. In similarity clauses, the standard can also be encoded as the clausal subject together with comparee.

Chapter 12 examines nonverbal clauses in Papuan Malay. The language employs three syntactically distinct types of nonverbal predicate clauses, namely nominal, numeral/quantifier, and prepositional predicate clauses. These clauses are formed by juxtaposition of the two main constituents; no copula intervenes. The three clause types also have distinct semantic functions. Nominal predicates have ascriptive or equative function and also encode possession. Numeral and quantifier predicates have determining function. Prepositional predicates encode locational or nonlocational relations between a figure and the ground.

Chapter 13 describes negative, interrogative, and directive clauses. Negative clauses are formed with the negation adverbs tida/tra ‘NEG’ or bukang ‘NEG’. Negator tida/tra ‘NEG’ is used for the negation of verbal, existential, and nonverbal prepositional clauses. Negator bukang ‘NEG’ is used to negate nonverbal clauses, other than prepositional ones, and to mark contrastive negation. As for interrogative clauses, three types of clauses can be distinguished: (1) content, or information questions which are formed with interrogatives and which elicit new information, (2) polar questions which elicit yes-no answers, and (3) alternative questions which require the interlocutor to choose the supposedly right answer from a list of possible answers. Directive
clauses in Papuan Malay include imperatives and hortatives, permissions and obligations, and prohibitives. They are used with any kind of predicate.

Chapter 14 discusses the Papuan Malay conjunctions and constituent combining. The conjunctions typically conjoin same-type constituents. Most of them combine clauses with clauses. Only two link different-type constituents, such as verbs with clauses. Typically, the conjunctions occur at the left periphery of the constituent they mark. The 21 conjunctions linking same-type constituents are divided into six groups according to the semantic relations they signal, namely addition, alternative, time and/or condition, consequence, contrast, and similarity. Almost all conjunctions occur in clause-initial position, while only two occur in clause-final position. Typically, the clause marked with a conjunction follows the unmarked clause; only a few conjunctions mark clauses which precede the unmarked clause.

The book closes with a set of appendices which include a 2,215-item wordlist which forms the basis for the phonological analysis in Chapter 2 and a sample of twelve texts, together with detailed metadata for these texts. The appendices are followed by a list of references, English and Dutch summaries of the book, and a brief curriculum vitae of the author.

Appendices
This appendix presents a sample of three Papuan Malay texts. Included are a spontaneous conversation, a spontaneous narrative, and an elicited joke. For each text the following meta data are provided: the text type, the interlocutors, and the length (in minutes).

A. Conversation: Wanting bananas

Text type: Conversation, spontaneous
Interlocutors: 1 male child, 2 younger females, 2 older females
Length (min.): 0:35

0001 Fanceria: kecil malam dia menangis pisang goreng
be.small night 3sg cry banana fry
Fanceria: (this) little (boy Nofi), (last) night he cried (for) fried bananas

0002 Marta: yo, dong dua deng Wili tu biking
yes 3pl two with Wili d.dist make

Marta: yes! he and Wili there worried (their) mother
Fanceria: *aw!* banana at *L.DIST* D.DIST REL want buy

Fanceria: *aw!* (it was) the bananas (from) over there which (Nofi) wanted to buy

Marta: [*up*] D.PROX NEG feel be.sick get hit be.continuous

Marta: [*up*] here doesn’t feel sick, (he) gets beaten continuously

Nofi: 1SG POSS one-thousand

Nofi: (that’s) my one thousand (rupiah bill)

Fanceria: yes, this is (only) paper (but not money) ((laughter))

Nofi: 2SG be.crazy or

Nofi: are you crazy?

Nofita: too be.mischievous RED~child at *L.PROX*

Nofita: (they are) too mischievous the children here

Fanceria: ah! Nofi

Fanceria: ah, Nofi [*up*]

Marta: [*Is*]

Marta: [*Is*]

Fanceria: mhm

Marta: (when) there aren’t (any) fried bananas, (then Nofi) cries (for) fried bananas
0013 Fanceria: ((laughter))
Fanceria: ((laughter))

0014 Nofita: *ada pisang goreng, tra maw makang*
exist banana fry neg want eat

Nofita: (when) there are fried bananas, (he) doesn’t want to eat (them)

0015 Marta: *ada pisang goreng, tida maw makang pisang goreng*
exist banana fry neg want eat banana fry

Marta: (when) there are fried bananas, (he) doesn’t want to eat fried bananas

0016 Klara: *putar balik, ana kecil itu* turn.around turn.around child be.small D.DIST

Klara: (Nofi) constantly changes (his) opinion, that small child

0017 Fanceria: *pisang goreng, pisang Sorong sana tu iii,*
banana fry banana Sorong L.DIST D.DIST oh

*besar~besar manis*
be.big be.sweet

Fanceria: fried bananas, those bananas (from) Sorong over there, oooh, (they) are all big (and) sweet

B. NARRATIVE: A MOTORBIKE ACCIDENT

Text type: Elicited text: Personal narrative

Interlocutors: 2 older males, 3 older females

Length (min.): 10:29

0001 Maria: *saya, Martina, Tinus, kitong* 1SG Martina Tinus 1PL

Maria: I, Martina, Tinus, we

0002 Hurki: *kitong tiga orang* 1PL three person

Hurki: we (were) three people

---

The previous evening, the narrator had already told the same story, but due to logistical problems, the author was not able to record the text. The next morning, however, the narrator was willing to retell her story, with the same audience being present.
Maria: *tiga orang, tra ada, tra usa*  
three person NEG exist NEG need.to

Maria: three people, no, no need (to mention that)

Marta: *kitong tiga orang*  
1pl three person

Marta: we (were) three people

Maria: *nene, kitorang tiga orang ((pause)), kitong lari*  
grandmother 1pl three person 1pl run

KE mARI sampe di jalangang  
to hither reach at route

Maria: (we) grandmothers, we were three people ((pause)), we drove (along the beach back to Sarmi) here (until we) reached the road (Lit. ‘reached the route’)

Hurki: *sampe di tenga jalang*  
reach at middle walk

Hurki: (until we) reached the middle of the road

Maria: *a, hssst, tida bole begitu, itu suda baik*  
ah! shhh! NEG may like.that D.DIST already good

maksut jadi ((laughter))  
purpose so

Maria: ah, shhh!, (you) shouldn’t (correct me), that’s already good (enough), since the meaning (is already clear) ((laughter))

Hurki: *adu, sampe di jalangang*  
oh.no! reach at journey

Hurki: oh boy! ‘(until we) reached the road’ (Literally: ‘reached the route’)

Maria: *ini sampe di jalangang, trus tukang ojek*  
D.PROX reach at road next craftsman motorbike.taxi

ini dia tida liat kolam ini, langsunj dia tabrak  
D.PROX 3sg NEG see big.hole D.PROX immediately 3sg hit.against

itu, kolam ke sana, langsunj mama jatu  
D.DIST big.hole to L.DIST immediately mother fall

Maria: what’s-its-name, until (we) reached the route, then this motorbike taxi driver, he didn’t see this big hole, immediately, he hit, what’s-its-name, the hole headlong, (and) immediately, I (‘mother’) fell off
I fell off backwards, Tinus here, he continued on, I had already fallen off the back (of the motorbike-taxi), as I fell, I rolled over immediately, I rolled over and over there.

Tinus, he and Martina here, the two of them drove continuously, the two of them drove on all the way to the river, but then Martina here, she let this motorbike taxi driver know, she said, ‘ah, motorbike taxi driver, what’s-her-name, our friend already fell off, with whom we were driving here earlier’

Nofita: [Is] you (have to) look over here, and then you tell the story, tell the story!, just tell the story! [up]

Maria: yes, (but) let her also see me

The personal pronoun de ‘3sg’ refers to the recording author.
lagi sampe di tempat yang dia buang saya
again reach at place REL 3SG discard 1SG

now this motorbike taxi driver, he returned again all the way to the place

where he’d thrown me off

0015 Iskia: minta maaf e?, tolong ceritra tu plang~plang

I took (medicine), I took (medicine), when it was the middle of the night, I took (medicine) again, in the morning I woke up, I ate sago, (I) ate cassava, I took (medicine) again

0043 trus sa tinggal sampe besok, suda sa rasa badang
next 1SG stay until tomorrow already 1SG feel body

suda baik
already be.good

then I stayed until the next day, by then my body already felt good
baru sa punya ana ini, mantri, de pi ambil
and.then 1SG POSS child D.PROX male.nurse 3SG go fetch

saya, kitong dua lari deng motor, dengang Roni, sa pu
1SG 1PL two run with motorbike with Roni 1SG POSS

ana mantri di Jayapura ini
child male.nurse at Jayapura D.PROX

and then, my child here, the male nurse, he came to pick me up, the two of us drove with (his) motorbike, with Roni, my young male nurse from Jayapura

MO: malam
night

[A guest arrives] MO: good evening

Maria: kitorang dua datang sampe di sini, ibu pendeta
1PL two come reach at L.PROX woman pastor

ini dia tanya, ko jatu ka? yo sa jatu dari motor,
D.PROX 3SG ask 2SG fall or yes 1SG fall from motorbike

kasiang sayang
pity love

the two of us came all the way here, Ms. Pastor here, she asked (me), ‘did you fall?’, ‘yes, I fell off the motorbike’, ‘poor thing, (my) dear’

sa tinggal di sini, sa ke ruma-sakit, sa ceritra sama
1SG stay at L.PROX 1SG to hospital 1SG tell to
dokter, dokter, sa jatu dari motor, dokter dorang bilang
doctor doctor 1SG fall from motorbike doctor 3PL say

begini, ko jatu bagemana?
like.this 2SG fall how

I stayed here, I went to the hospital, I talked to the doctor, ‘doctor, I fell off a motorbike’, the doctor and his companions said like this, ‘how did you fall off?’

sa bilang, sa jatu balik begini, trus tulang
1SG say 1SG fall turn.around like.this next bone

pata, sa bilang, tulang bahu yang pata, tulang
break 1SG say bone shoulder REL break bone
I said, ‘I fell backwards like this, then the bone broke’, I said, ‘(it’s my) shoulder bone which is broken, (my) ribs’, ‘oh! ah, mother that is just because you’re under shock’

I said like this, ‘oh no!, doctor, what’s-its-name, I fell really painfully, (you) have to help me’, ‘ah mother, I give (you) medicine (and) you (‘mother’) take (it)’, I said, ‘doctor, thank you’

I went home all the way to here, I told Ms. Pastor, ‘Madam, give me water (so that) I (can) take (my) medicine’, I stayed here for one week, uh, two weeks, only then did I return home

I went home to Waim again, and then we stayed (there), and then my community asked me, ‘Madam, have you recovered?’ I said, ‘I’ve recovered’, thank you!, this is all (Literally: ‘reach here’)
C. JOKE: DRAWING A MONKEY

Text type: Joke (elicited text)

Interlocutors: 2 younger males

Length (min.): 0:59

0001 skola ini ibu mulay suru ana~ana murit mulay school D.PROX woman start order RED~child pupil start gambar monyet di atas pohong pisang, suda, ibu draw monkey at top tree banana already woman mulay suru gambar, suda dong mulay, smua dong gambar start order draw already 3PL start all 3PL draw

(in) this school, Ms. (Teacher) starts ordering the school kids to start drawing a monkey on a banana tree, well, Ms. Teacher orders (them to) draw, well, they start, they all draw (a picture)

0002 baru ana kecil satu ini de tra gambar, ana and.then child be.small one D.PROX 3SG NEG draw child murit satu ni de tra gambar, suda, begini de pupil one D.PROX 3SG NEG draw already like.this 3SG gambar batu, trus de gambar monyet ini di bawa draw stone next 3SG draw monkey D.PROX at bottom pohong pisang, begini dong bawa ke depang tree banana like.this 3PL bring to front

but then this particular small child, he doesn’t draw, this particular school kid, he doesn’t draw, well, he draws a stone (instead), and then he draws this monkey under the banana tree, it goes on like this (and) they bring (their drawings) to the front

0003 ibu bilang, ibu kalo toki meja langsung kumpul woman say woman if beat table immediately gather ke depang, suda pace de pikir~pikir sampe tra to front already man 3SG RED~think reach NEG jadi, suda begini langsung i ibu become already like.this immediately TRU-woman woman bagi meja, pak!, langsung pace gambar [UP] itu, divide table bang! immediately man draw D.DIST
Ms. (Teacher) says, ‘when I knock (on) the table, (you) bring (your pictures) together to the front immediately’, then the guy thinks on and on (but) nothing happens, as it goes on like this immediately Ms.[TRU], Ms. (Teacher) hits the table, ‘bang!’, immediately the guy draws [UP], what’s-its-name, a monkey under a banana tree (and) brings it to the front

Ms. (Teacher) says, uh, after Ms. (Teacher) has finished checking (the pictures), Ms. (Teacher) asks (them), ‘this (picture here), whose is (it)?’, he says, ‘Madam, (it’s) mine’, she asks (him), the guy comes to the front, Ms. (Teacher) asks him, ‘why did you draw the monkey under the banana tree?’

he says, ‘oh no!, Madam!, a little bit earlier you (‘Madam’) knocked on the table, that’s why the monkey fell off from the top (of the banana plant)’
