Figure 3

A. Composite image of protein bands for GSDMD FL and GSDMD NT in cell extract.

B. Composite image of protein bands for GAPDH in cell extract.

C. Composite image of protein bands for caspase-1 p20 in culture medium.

D. Composite image of protein bands for caspase-1 p10 in culture medium.

E. Composite image of protein bands for IL-18 in culture medium.

Chemiluminescence images are also shown for each set of protein bands.
