S1 Table. Top 30 terms for term-frequency, IDF, TFIDF and entropy.

| Term-Frequency (high to low) | IDF (low to high) | TFIDF (low to high) | Entropy (high to low) |
|------------------------------|------------------|---------------------|------------------------|
| 1 include                   | include          | include             | include                |
| 2 first                     | method           | one                 | method                 |
| 3 method                    | one              | method              | one                    |
| 4 device                    | device           | comprise            | device                 |
| 5 second                    | first            | form                | comprise               |
| 6 one                       | second           | least               | first                  |
| 7 form                      | comprise         | device              | system                 |
| 8 apparatus                 | form             | system              | apparatus              |
| 9 system                    | system           | apparatus           | second                 |
| 10 least                    | least            | receive             | form                   |
| 11 may                      | apparatus        | second              | least                  |
| 12 comprise                 | may              | first               | may                    |
| 13 plurality                | plurality        | may                 | plurality              |
| 14 base                      | base             | plurality           | disclose               |
| 15 connect                  | receive          | base                | receive                |
| 16 receive                  | connect          | connect             | base                   |
| 17 portion                  | disclose         | within              | connect                |
| 18 control                  | control          | disclose            | within                 |
| 19 position                 | two              | two                 | control                |
| 20 two                      | within           | position            | two                    |
| 21 process                  | position         | control             | process                |
| 22 surface                  | process          | generate            | position               |
| 23 within                   | generate         | determine           | generate               |
| 24 generate                 | portion          | extend              | determine              |
| 25 configure                | determine        | portion             | portion                |
| 26 determine                | surface          | make                | make                   |
| 27 signal                   | configure        | surface             | relate                 |
| 28 end                      | extend           | allow               | extend                 |
| 29 disclose                 | make             | process             | contain                |
| 30 data                     | relate           | configure           | surface                |
