Pathway enrichment of Cluster 1
- Regulation of cytokine production
- Regulation of inflammatory response
- Platelet degranulation
- Interferon-gamma-mediated signaling pathway
- Regulation of TNF superfamily cytokine production
- Interleukin-10 signaling

Pathway enrichment of Cluster 2
- Neutrophil degranulation
- Neutrophil activation involved in immune response
- Granulocyte activation
- Lysosome
- Vacuole organization

Pathway enrichment of Cluster 3
- Neutrophil degranulation
- Neutrophil activation involved in immune response
- Regulation of cytokine production
- Superoxide metabolic process
- Cellular response to oxidative stress

Pathway enrichment of Cluster 4
- Neutrophil degranulation
- Neutrophil activation involved in immune response
- Lysosome
- Apoptosis
- Cell killing
