**Table S1.** Histological findings related to infection status in rodents trapped in dairy farms at Los Ríos region, Chile.

| Organ | Lesion                        | Infected (%) | No infected (%) |
|-------|-------------------------------|--------------|-----------------|
| Kidney| Interstitial nephritis        | 74.0         | 50.0            |
|       | Hemorrhage                    | 36.4         | 31.8            |
|       | Hemorrhage                    | 68.8         | 61.4            |
| Lung  | Congestion                    | 31.2         | 40.9            |
|       | Inflammatory mononuclear      | 49.4         | 45.5            |
|       | infiltration                 |              |                 |
|       | Inflammatory mononuclear      | 45.5         | 29.5            |
|       | infiltration                 |              |                 |
| Liver | Hemorrhage                    | 9.1          | 18.2            |
|       | Congestion                    | 9.1          | 9.1             |
|       | Necrosis                      | 28.6         | 45.5            |
| Heart | Inflammatory mononuclear      | 29.9         | 18.2            |
|       | infiltration                 |              |                 |
