### Supplementary Table 2. Clinical outcomes according to timing of enteral nutrition in patients without shockable initial rhythm

| Variable                      | Delayed nutrition support (n=19) | Early nutrition support (n=16) | Total (n=35) | P-value |
|-------------------------------|----------------------------------|-------------------------------|--------------|---------|
| Intensive care (day)          | 6.7±5.3                          | 11.9±7.8                      | 9.2±7.0      | 0.023   |
| Total hospital stay (day)     | 6.0±5.6                          | 17.0±46.0                     | 11.5±33.0    | 0.088   |
| APACHE II score               | 21.7±9.9                         | 16.8±6.9                      | 19.4±8.9     | 0.097   |
| Survival to discharge         | 7 (36.8)                         | 14 (82.4)                     | 21 (58.3)    | <0.006  |
| Good neurologic outcome b     | 2 (10.5)                         | 8 (47.1)                      | 10 (27.8)    | 0.025   |
| Complication                  |                                  |                               |              |         |
| Aspiration pneumonia          | 4 (21.1)                         | 4 (23.5)                      | 8 (22.2)     | 1       |
| Regurgitation                 | 2 (10.5)                         | 2 (11.8)                      | 4 (11.1)     | 1       |
| Ileus                         | 1 (5.3)                          | 0                              | 1 (2.8)      | 1       |
| Fever                         | 10 (52.6)                        | 5 (29.4)                      | 15 (41.7)    | 0.158   |
| Hypoglycemia                  | 4 (21.1)                         | 4 (23.5)                      | 8 (22.2)     | 1       |
| Hyperglycemia                 | 7 (36.8)                         | 11 (64.7)                     | 18 (50.0)    | 0.095   |

Values are presented as mean±standard deviation or number (%).
APACHE: Acute physiology and chronic health evaluation.
a) Median±standard deviation; b) Cerebral performance category ≤2.
