Multimedia Appendix 6. Perceived scope of areas to be expanded among physicians.

| What scope of sharable data do you think eHRSS can be expanded? | Enrollees | Non-enrollees |
|---------------------------------------------------------------|-----------|---------------|
| Radiology image                                              | 73.79%, n=335 | 75.00%, n=231 |
| Chinese Medicine                                             | 9.47%, n=43  | 22.73%, n=70  |
| Obstetrics data                                              | 16.52%, n=75  | 21.10%, n=65  |
| Patient home monitoring data                                 | 22.91%, n=104 | 27.92%, n=86  |
| Others                                                       | 21.37%, n=97  | 11.69%, n=36  |

Base: Enrollee = 454; Non-enrollee = 308
Note: Multiple answers were allowed. Others included “Outpatient record”, “Clinic consultation notes”, “Operation record”.
