Erratum to: JHEP07(2020)195

ArXiv ePrint: 2004.03602

In the paper a NLL contribution of the gluon vertex correction figure 4(c) has been omitted. Including this contribution results in the following corrections. In the integrand of eq. (3.5) $\eta + \xi$ should be replaced with $4\eta + 4\xi - 2$. In eqs. (3.5), (3.6) $g_\gamma(x)$ should be replaced with $4g_\gamma(x) - g(x)$. In eq. (3.7) the coefficients of $C_F x$ and $C_F x^2$ terms should be corrected from $1/5$ and $1/35$ to $3/10$ and $1/21$, respectively. In the second and third lines of eq. (4.2) the coefficients of $C_F$ terms should be corrected from $1$ and $1/7$ to $3/2$ and $5/21$, respectively. In the text below eq. (4.2) the coefficient $(C_A - C_F)(11C_A/9 - 3C_F/2 - 2T_F)/640$ should be corrected to $(C_A - C_F)(11C_A/9 - C_F - 10T_F/3)/640$. The numerical values of the NNLO and N\textsuperscript{3}LO NLL corrections in table 1 should be changed from $-2.170$ and $-2.189$ to $-2.183$ and $-2.204$, respectively. After the correction the abelian part of our result agrees with the results [1–3] for the Higgs boson two-photon decay amplitude. The numerical impact of the correction on the threshold cross section in NNLO and N\textsuperscript{3}LO is very small.
