ABSTRACT: The impact of Second Wave COVID-19 Pandemic on the lives of Daily Wage Earners has been largely devastated at unprecedented levels during the Lockdown and it has driven our economy to recession. India’s COVID-19 cases have once again penetrated to increase in numbers with every passing day. With the rise in number of COVID-19 cases, at the same time increase the rate of death especially the people who are affected by COVID-19. As Government imposing Curfews, once again the Daily Wage Earners are facing uncertainty. Daily Wage Earners include construction workers, street vendors, painters, weightlifting, masons, Rickshaw-puller and many more. This informal sector workers does not have necessary resources for survival. Wages play an important role in maintaining the livelihood as they rely on their Daily Wages. This results in decrease of purchasing power due to job losses or pay cuts. The level of anxiety and fear has increased among the lives of Daily Wage Earners. The pandemic has worsened the condition of Daily Wage Earners as it has put the risk of facing extreme poverty. The workers fighting on two fronts of life: Firstly, to protect themselves from pandemic threat and Secondly to battle for survival. This study will elucidate the difficulties outbrave by the Daily Wage Earners. A survey was taken among 150 Daily Wage Earners to derive the problems come across by them. The research work is based on primary source of data collected by direct questionnaire to the Daily Wage Earners of Jorhat District of Assam.

KEYWORDS: COVID-19, Daily Wage Earners, Lockdown, Government, Curfew, Livelihood.

INTRODUCTION
The Second Wave COVID-19 Pandemic has promptly escalation across the World. The Assam Government imposes restriction due to exponential rise in cases. On 5th May, 2021 Government issue shut down of shops at 2pm and curfew has been extended from 6pm to 5am. Then again on 16th May, Government issued an order for total ban on movement of individuals from 12noon to 5am daily. The streets of Assam remains largely empty due to Government’s Lockdown or Curfew. The days of Curfew drastically affected the lives of Daily Wage Earners in Assam. A Daily Wage Worker earn Rs.400 to Rs.500 a day but now it is difficult to get work. Many Workers are already excluded from work by the owner. Workers are forthwith turned out to be unemployed. Particularly, workers are facing variety of problems such as Wages have dipped by half, Job Loss, Food prices increased, Hunger, no other source of income. The lives of Daily Wage Earners got pathetic everyday. This is time when government employees, NGO’s to donate a grocery kit and save them from deprivation and other health issues.

LITERATURE REVIEW
*Sakshi Sahni, Aulakh Singh Rawal (Nov 2020), in the paper examine the impact of COVID-19 on Rural Migrants in India. It focused mainly on Social Impact and Economic Impacts faced by Rural Migrants. From the study it is observed that 42 crore people have received Financial Assistance, free food grains supply and Rs.500 deposit to Jandhan amounts of women. But after losing many lives of Migrants. Migrants play an important role in our economy without which the economy will not be to continue.

*Padmakar Shahare, Mukul Burghate (Feb 2021), the Impact and Challenges of COVID-19 Lockdown on Daily Wage Workers and their livelihood mentioned in their paper that reveals the standard of living for Daily Wagers during the Blockade period. Paper takes both questionnaires and hypothesis for the study. The study revealed the majority of Workers are illiterate and face unitedly financial and food problems. “Impact of Second Wave Covid -19 on Daily Wage Earners”

Interpretation: From the survey, it is clear that 40% of the respondents got help from the Government and remaining 60% of the respondents did not get any support due to unaware of Government assistance.

FINDINGS
1. Majority of respondents are of 31 to 40 years of age doing daily wage work and 50% of workers are illiterate and live underprivileged economy condition, so they have to envelope the basic needs for survival, medical overhead and children’s education.
2. The main sources of livelihood for daily wage earner were generally dependent on government schemes, borrowings from relatives and various micro finance groups. And few workers had to approach both to make ends meet for their family.
3. The most rated difficulties faced by workers are food and money problem as they are the basic necessit
4. Due to financial uncertainty, workers suffer from emotion stress, depression, anxiety.
5. It is also found that due to curfew only few workers got half the usual wages.
6. Some employer/owner provides grocery kit to their workers for livelihood support.
7. From the analysis it is found that due to lake of awareness about government assistance 60% of workers did not seek help from government.

CONCLUSION
The second wave COVID-19 extremely drives challenges to the economic informal sector. Due to curfew, daily wage earners faced a heavy loss. They depend on daily wage for their livelihood, but due to financial uncertainty they have to face monetary as well food crisis. It is the foremost responsibility of the government to safeguard the livelihood conditions and economy of the daily wage earners. And the Assam government has to made complete arrangement for the daily wage workers before the implementation of curfew. There is need for general information campaigns about government assistance provided for poor people of Assam. The security and mental health of workers are most important for growth of the economy. It is necessary to offer reliability to daily wage workers to retain them economically pleasant. Thus, the problems faced by daily wage earners during blockade period have been analyzed.
