How to cite this retraction
Ghanchi H, Takayanagi A, Savla P, et al. (January 13, 2021) Retraction: Effects of the COVID-19 Pandemic on Stroke Patients. Cureus 13(1): r22. doi:10.7759/cureus.r22

Retraction Notice
This article has been retracted as it includes data published without permission from the Get With the Guidelines database, which is property of American Heart Association (AHA). Although the authors' hospital had access to this database and they did receive IRB approval, the terms of use between the hospital and AHA do not allow publication of the data in a public sphere. The authors were hoping to receive retrospective approval from the AHA but have not been successful in getting this permission thus far. As a result this article has been retracted at the request of the AHA and with full agreement by the authors.
