Erratum to: Auxiliary midwives in hard to reach rural areas of Myanmar: filling MCH gaps

Sangay Wangmo 1*, Rapeepong Suphanchaimat 1, Wai Mar Mar Htun 2, Tin Tun Aung 2, Chiraporn Khitdee 1, Walaiporn Patcharanarumol 1, Pe Thet Htoo 3 and Viroj Tangcharoensathien 1

Erratum
In the publication of this article [1], the following percentage symbols were accidentally missed out from the ‘Results’ and ‘Discussion’ sections:

Results
2. Becoming an auxiliary midwife: the pathways...as 89% reported...
3. AMW: contributions of and supports to AMW...about 9% of the respondents...
...such as technical supervision (99%), refresher course (99%), replenishment of AMW kits (96%)...
4. AMW: Intention to stay...if they needed to change their domicile (21%)

Discussion
...Naturally in Myanmar, 39% of AMWs...

In addition to the above, some figures in Table 4 were misaligned. The updated Table 4 is presented below:

| Variables | Frequency | Percent |
|-----------|-----------|---------|
| Expected years to serve the community | | |
| < 1 years | 12 | 1.1 |
| 1–3 years | 58 | 5.1 |
| 3–5 years | 39 | 3.5 |
| > 5 years | 1019 | 90.3 |
| Reasons for quitting AMW jobs | | |
| Marriage | | |
| May consider quitting jobs | 45 | 4.2 |
| Not relevant to the decision of quitting jobs | 1023 | 95.8 |
| Changing domicile | | |
| May consider quitting jobs | 218 | 21.3 |
| Not relevant to the decision of quitting jobs | 806 | 78.7 |
| Having another permanent job | | |
| May consider quitting jobs | 124 | 12.4 |
| Not relevant to the decision of quitting jobs | 878 | 87.6 |
| Cannot contribute to the community as much as expected | | |
| May consider quitting jobs | 228 | 22.6 |
| Not relevant to the decision of quitting jobs | 779 | 77.4 |

All the above have been updated in the original article.
