SPECIAL SECTION ON FOG/EDGE COMPUTING FOR AUTONOMOUS AND CONNECTED CARS

EDITORIAL
Introduction to the Special Section on Fog/Edge Computing for Autonomous and Connected Cars ........................................... A.-C. Pang, E. Au, B. Ai, and W. Zhuang 3059

SPECIAL SECTION PAPERS
Adaptive Learning-Based Task Offloading for Vehicular Edge Computing Systems ....................................................... Y. Sun, X. Guo, J. Song, S. Zhou, Z. Jiang, X. Liu, and Z. Niu 3061
Smart Network Slicing for Vehicular Fog-RANs .......................... K. Xiong, S. Leng, J. Hu, X. Chen, and K. Yang 3075
Twin-Timescale Artificial Intelligence Aided Mobility-Aware Edge Caching and Computing in Vehicular Networks ........................................... L. T. Tan, R. Q. Hu, and L. Hanzo 3086
A Mobility-Aware Vehicular Caching Scheme in Content Centric Networks: Model and Optimization ................................................................. Y. Zhang, C. Li, T. H. Luan, Y. Fu, W. Shi, and L. Zhu 3100
Computation Resource Allocation and Task Assignment Optimization in Vehicular Fog Computing: A Contract-Matching Approach ........................................... Z. Zhou, P. Liu, J. Feng, Y. Zhang, S. Muntaz, and J. Rodriguez 3113
Parking Reservation Auction for Parked Vehicle Assistance in Vehicular Fog Computing ................................................................. Y. Zhang, C.-Y. Wang, and H.-Y. Wei 3126
Short-Term Traffic Prediction for Edge Computing-Enhanced Autonomous and Connected Cars ................................................................. S.-R. Yang, Y.-J. Su, Y.-Y. Chang, and H.-N. Hung 3140

REGULAR PAPERS

Connected Vehicle Series
A Cooperative Road Topology-Based Handoff Management Scheme .......................... H. Ahmed, S. Pierre, and A. Quintero 3154
Deep Reinforcement Learning Based Resource Allocation for V2V Communications ........................................... H. Ye, G. Y. Li, and B.-H. F. Huang 3163

Channel Models
Gaussian Mixture Model for Millimeter-Wave Cellular Communication Networks ................................................................. X. Liu, J. Xu, Y. Pei, and Y.-C. Liang 3174
An Efficient MIMO Channel Model for LTE-R Network in High-Speed Train Environment ................................................................. J. Yang, B. Ai, S. Salous, K. Guan, D. He, G. Shi, and Z. Zhong 3189

(Contents Continued on Page 3057)
Transportation Systems

Autonomous Vehicles: Autodriver Algorithm and Vehicle Dynamics ................................................................. 3201

A Novel Reentry Trajectory Generation Method Using Improved Particle Swarm Optimization ............................. 3212

Fine-Grained Vehicle Classification With Channel Max Pooling Modified CNNs .................................................. 3224

Stochastic-Based Optimal Charging Strategy for Plug-In Electric Vehicles Aggregator Under Incentive and Regulatory Policies of DSO .............................................................................................................. 3234

Cyber-Physical Predictive Energy Management for Through-the-Road Hybrid Vehicles ........................................ 3246

Vehicular Electronics

Design and Evaluation of a Prototype System for Real-Time Monitoring of Vehicle Honking .................................................. 3257

Overview of Three-Stage Power Converter Topologies for Medium Frequency-Based Railway Vehicle Traction Systems 3268

Energy Management of Hybrid Electric Vehicle Using Vehicle Lateral Dynamic in Velocity Prediction ........................ 3279

Extending the Autonomy of a Battery for Electric Motorcycles .................................................................................. 3294

Global Trends in High-Power On-Board Chargers for Electric Vehicles ........................................................................ 3306

Power Factor Improvement in Modified Bridgeless Landsman Converter Fed EV Battery Charger ............................ 3317

Automotive Traction Inverters: Current Status and Future Trends .......................................................... 3337

A Low-Voltage and High-Current Power Transfer System With Low Harmonics for Automatic Guided Vehicles 3351

Two-Step Multi-Objective Management of Hybrid Energy Storage System in All-Electric Ship Microgrids .............. 3361

A Theoretical Investigation of the Detection of Vital Signs in Presence of Car Vibrations and RADAR-Based Passenger Classification ................................................................. 3374

Optimal Energy Management for a Mild Hybrid Vehicle With Electric and Hybrid Engine Boosting Systems ........ 3386

Inverter Operating Characteristics Optimization for DC Traction Power Supply Systems ........................................ 3400

An Active Damping Control Method for the LLCL Filter-Based SIC MOSFET Grid-Connected Inverter in Vehicle-to-Grid Application ................................................................. 3411

Advanced Angle Field Weakening Control Strategy of Permanent Magnet Synchronous Motor ............................... 3424

Integration of On-Line Control in Optimal Design of Multimode Power-Split Hybrid Electric Vehicle Powertrains 3436

Design Optimization of a Spoke-Type Permanent-Magnet Vernier Machine for Torque Density and Power Factor Improvement ........................................................................................................... 3446

A Sliding-Mode Virtual Sensor for Wheel Forces Estimation With Accuracy Enhancement via EKF .......................... 3457

Wireless Communications

Secure Wideband Beamforming Design for Two-Way MIMO Relaying Systems .................................................... 3472

Resource Allocation for Search and Track Application in Phased Array Radar Based on Pareto Bi-Objective Optimization 3487

A Scheme for Trustworthy Friendly Jammer Selection in Cooperative Cognitive Radio Networks .......................... 3500

Coverage in Downlink Heterogeneous mmWave Cellular Networks With User-Centric Small Cell Deployment 3513

(Contents Continued on Page 3058)
(Contents Continued from Page 3057)

Capacity of Multiconnectivity mmWave Systems With Dynamic Blockage and Directional Antennas ................................................................. M. Gerasimenko, D. Moltchanov, M. Gapeyenko, S. Andreev, and Y. Koucheryavy 3534
Physical-Layer Network Coding Based Decoding Scheme for Random Access .............................................................................................................. Z. Sun, L. Yang, J. Yuan, and D. W. K. Ng 3550
Performance Analysis of Analog Intermittently Nonlinear Filter in the Presence of Impulsive Noise .............................................................. R. Barazideh, B. Natarajan, A. V. Nikitin, and S. Niknam 3565
Multibeam Dual-Circularly Polarized Reflectarray for Connected and Autonomous Vehicles ................................................................. Q. Luo, S. Gao, W. Li, M. Sobhy, I. Bakaimi, C. H. K. de Groot, B. Hayden, I. Reaney, and X. Yang 3574
Exploiting Wireless Broadcast Advantage for Energy Efficient Packet overhearing in WiFi ................................................................. B. Feng, C. Zhang, H. Ding, and Y. Fang 3586
System Outage Performance for Three-Step Two-Way Energy Harvesting DF Relaying ................................................................. L. Shi, Y. Ye, R. Q. Hu, and H. Zhang 3600
Analysis of Optimal Combining in Rician Fading With Co-Channel Interference ................................................................. M. Srivivasan and S. Kalyani 3613
Impact Assessment of the L-Band Digital Aeronautical Communications System on the Joint Tactical Information Distribution System .......... M. A. Bellido-Manganell, T. Gräupl, and M. Schnell 3629
Iterative Approaches for Massive MIMO Uplink Processing Under Imperfect Channel Conditions ................................................................. F. Jiang, C. Li, Z. Gong, K. Hao, S. Liu, and Y. Zhang 3642
Recursive Carrier Interferometry Aided High Data Rate OFDM Systems With PAPR Suppression, Phase Noise Rejection, and Carrier Frequency Offsets Compensation ................................................................. H. Lu, L. Zhang, X. Chen, and Z. Wu 3655
A Multi-Carrier-Frequency Random-Transmission Chirp Sequence for TDM MIMO Automotive Radar ................................................................. X. Hu, Y. Li, M. Lu, Y. Wang, and X. Yang 3672
Double Full Diversity Massive Unitary Space–Time Codes for MIMO Channels ................................................................................. S. Li, J.-K. Zhang, and X. Mu 3686
Joint Base Station Activation and Coordinated Downlink Beamforming for HetNets: Efficient Optimal and Suboptimal Algorithms ................................................................................................................................. S. Bi, Z. Fang, X. Yuan, and X. Wang 3692
A Novel Two-Way In-Band Full-Duplex Cooperative System ................................................................................................................................. J. Bae, E. Park, and Y. Han 3713
Coexistence of Direct and Relayed Transmission Users in Multi-Cell Massive MIMO Systems ................................................................. P. Dong, H. Zhang, W. Xu, and G. Y. Li 3728
Automotive Radar Interference Mitigation Using Adaptive Noise Canceller ................................................................................................................. F. Jin and S. Cao 3747
The Application of Antenna Diversity to NOMA With Statistical Channel State Information ................................................................. M.-Y. Gong and Z. Yang 3755
Compressive Random Access With Multiple Resource Blocks and Fast Retrial ......................................................................................................................... J. Choi 3766
Multicell Massive MIMO: Downlink Rate Analysis With Linear Processing Under Ricean Fading ................................................................. S.-N. Jin, D.-W. Yue, and H. H. Nguyen 3777
Interference-Aware Online Distributed Channel Selection for Multicluster FANET: A Potential Game Approach ................................................................. J. Chen, Y. Xu, Q. Wu, Y. Zhang, X. Chen, and N. Qi 3792
Exploiting Resource Contention in Highly Mobile Environments and Its Application to Vehicular Ad-Hoc Networks ................................................................. V. V. Paranthaman, Y. Kirsal, G. Mapp, P. Shah, and H. X. Nguyen 3805
NetSlic: Base Station Agnostic Framework for Network SliciCing ................................................................................................................. G. Tseliou, F. Adelantado, and C. Verikoukis 3820

Wireless Networks

Big Data Processing With Minimal Delay and Guaranteed Data Resolution in Disaster Areas ......................................................................................................................... J. Wang, K. Sato, S. Guo, W. Chen, and J. Wu 3833
A Heuristic Statistical Testing Based Approach for Encrypted Network Traffic Identification ................................................................. W. Niu, Z. Zhuo, X. Zhang, X. Du, G. Yang, and M. Guizani 3843
Efficient and Privacy-Preserving Truth Discovery in Mobile Crowd Sensing Systems ......................................................................................................... G. Xu, H. Li, S. Liu, M. Wen, and R. Lu 3854
Hierarchical Radio Resource Allocation for Network Slicing in Fog Radio Access Networks ................................................................. Y. Sun, M. Peng, S. Mao, and S. Yan 3866
Coverage Analysis for Multi-Request Association Model (MRAM) in a Caching Ultra-Dense Network ................................................................. K. S. Khan and A. Jamalipour 3882
Beef Up mmWave Dense Cellular Networks With D2D-Assisted Cooperative Edge Caching ................................................................................. W. Wu, N. Zhang, N. Cheng, Y. Tang, K. Aldubaikh, and X. Shen 3890
Performance Evaluation of Heterogeneous IoT Nodes With Differentiated QoS in IEEE 802.11ah RAW Mechanism ................................................................. M. Z. Ali, J. Mišić, and V. B. Mišić 3905
Analysis of Licklider Transmission Protocol for Reliable File Delivery in Space Vehicle Communications With Random Link Interruptions ......................................................................................................... G. Yang, R. Wang, S. C. Burleigh, and K. Zhao 3919

(Contents Continued on Back Cover)
UDiPP: A Framework for Differential Privacy Preserving Movements of Unmanned Aerial Vehicles in Smart Cities ........................................ H. Kim, J. Ben-Othman, and L. Mokdad 3933
UAV-Assisted Supporting Services Connectivity in Urban VANETs ................................................................. O. S. Oubbati, N. Chaib, A. Lakas, P. Lorenz, and A. Rachedi 3944
Full-Duplex Device-to-Device Cellular Networks: Power Control and Performance Analysis ................................................................. H. V. Vu, N. H. Tran, and T. Le-Ngoc 3952
Delay-Minimization Routing for Heterogeneous VANETs With Machine Learning Based Mobility Prediction ............................... Y. Tang, N. Cheng, W. Wu, M. Wang, Y. Dai, and X. Shen 3967
Throughput Analysis of Vehicular Internet Access via Roadside WiFi Hotspot ......................................................................................................................... W. Xu, W. Shi, F. Lyu, H. Zhou, N. Cheng, and X. Shen 3980
Incentive Mechanisms for Mobile Crowdsensing With Heterogeneous Sensing Costs ........................................ X. Zhang, L. Jiang, and X. Wang 3992
Millimeter-Wave Backhaul Traffic Minimization for CoMP Over 5G Cellular Networks ................................................................. Y.-J. Yu, T.-Y. Hsieh, and A.-C. Pang 4003
Quality of Service Performance Analysis of Relaying Networks With Multiple Buffer-Aided Relays ................................. S. Efazati, B. Ghalamkari, P. Azmi, and E. A. Jorswieck 4016
QoS-Aware Cooperative Computation Offloading for Robot Swarms in Cloud Robotics ................................................ Z. Hong, H. Huang, S. Guo, W. Chen, and Z. Zheng 4027

CORRESPONDENCE

Communication Circuits & Systems
Integrated Millimeter-Wave Wideband End-Fire 5G Beam Steerable Array and Low-Frequency 4G LTE Antenna in Mobile Terminals ........................................ M. M. S. Taheri, A. Abdipour, S. Zhang, and G. F. Pedersen 4042

Vehicular Electronics
A Compact Conformal Windshield Antenna for Location Tracking on Vehicular Platforms ................................................................. S. A. B, E. F. Sundarsingh, and H. A 4047

Wireless Communications
Near-Capacity Multilayered Code Design for LACO-OFDM-Aided Optical Wireless Systems ................................. Z. Babar, X. Zhang, P. Botsinis, D. Alanis, D. Chandra, S. X. Ng, and L. Hanzo 4051
Unequal Error Protection SCMA Codebooks ................................................................. Z. Mheich, L. Wen, P. Xiao, and A. Maaref 4055
Efficient Constant Envelope Precoding With Quantized Phases for Massive MU-MIMO Downlink Systems ................................. J.-C. Chen 4059
Distributed Foresighted Energy Management in Smart-Grid-Powered Cellular Networks ..................................................... X. Zhang, M. R. Nakhai, G. Zheng, S. Lambotharan, and J. A. Chambers 4064
UAV-Enabled Secure Communications: Joint Trajectory and Transmit Power Optimization ..................................................... X. Zhou, Q. Wu, S. Yan, F. Shu, and J. Li 4069
Data-Driven Deep Learning for Automatic Modulation Recognition in Cognitive Radios ................................................................. Y. Wang, M. Liu, J. Yang, and G. Gui 4074
Low-Complexity Matrix-Based Conjugate Gradient Channel Estimation for Cooperative Wireless Sensor Networks ................................. T. Wang, F. Long, T. Ma, L. Gao, Y. Jiang, and L. Chang 4078
Enhanced Repeat Transmission Technique for Statistical Signal Transmission ........................................ T. Xu, M. Zhang, and H. Hu 4084

Wireless Networks
An Information-Theoretic View of WLAN Localization Error Bound in GPS-Denied Environment ................................................................. M. Zhou, Y. Wang, Y. Liu, and Z. Tian 4089
Collision Resolution Protocol via Soft Decision Retransmission Criterion ................................................................. J. C. Marinello and T. Abrão 4094
Effective Capacity and Power Allocation for Machine-Type Communication ................................................................. M. Shehab, H. Alves, and M. Latva-aho 4098
