# Table of Contents: Fourth International Congress of CiiEM: Health, Well-Being and Ageing in the 21st Century

## Editorial

### II Key-notes

Aging the death: the importance of having better methods for age at death estimation of old individuals  
DNA Use in Forensic Human Identification  
Interactive Technologies in Stroke Recovery: Uncovering Challenges and Opportunities through Physiotherapist’s Perspective  
Might synthetic cannabinoids influence neural differentiation?  
Modulation of the initial stages of systemic inflammation by intervention in the NFkB signalling pathway  
Molecular Biomarkers Associated with Respiratory Insufficiency in Amyotrophic Lateral Sclerosis  
Nursing communication handover in emergency department  
Pathologic expansion in the C9orf72 gene is associated with accelerated decline of respiratory function and decreased survival in amyotrophic lateral sclerosis  
Risk indicators in families with abused children and young people: scoping review  
Role of fibrinogen-erythrocyte and erythrocyte-erythrocyte adhesion on cardiovascular pathologies  
Satisfaction with nursing care: influence of sociodemographic factors on a sample of hospitalised children  
Sexual Well-Being in Old Age: Are Older Adults Well Sexually?  
The oral – systemic link: oral infection/inflammation and the relation to general health

## III Free Communications

### Biochemistry and Biology

#### Biochemistry

Effect of saccharomycin, a natural Saccharomyces cerevisiae biocide, on Hanseniaspora guilliermondii cells surface  
Interaction between gold nanoparticles and blood proteins  
Survey of biogenic amines (histamine and spermidine) in commercial seafood by Enzyme Linked Immunosorbent Assay (ELISA)

#### Biology

Interleukin gene cloning and expression in E. coli  
The genetic susceptibility linking preterm birth and periodontal disease – A review

#### Biomedical Sciences

A review on Tumour Treating Fields, a novel modality in cancer treatment  
Automedication in utentes of municipality of Almada  
Chemically crosslinked PVA hydrogels for cartilage substitution

© 2021 The Author(s). Published by Informa UK Limited, trading as Taylor & Francis Group. Discrimination by X-ray fluorescence analysis of elemental concentrations in healthy and diseased rat tissues

Hydrogels based on poly(vinyl alcohol) for cartilage substitution

Influence of the liquid phase content and presence of hydroxypropyl methyl cellulose on the properties of a calcium phosphate bone cement

Layer-by-Layer coated silicone-based soft contact lens hydrogel for diclofenac sustained release

Nanoencapsulation as a novel delivery approach for therapeutic applications of gla-rich protein (GRP)

Neuromodulation of Lower Limb Motor Pathways with Trans-spinal Direct Current Stimulation: an overview of current findings

Physically crosslinked polyvinyl alcohol hydrogels as synthetic cartilage materials

Profiles of elemental concentrations in human: contribution of X-ray fluorescence to discrimination between healthy and diseased tissues and prediction of alterations in tongue carcinoma

PVA/chitosan hydrogels loaded with octenidine and 2-phenoxethanol for wound dressings

Chemistry

Direct Esterification of Sucrose: Novel Lead-Compounds Against Cancer

Gold(III) bisdithiolate complexes: molecular conductors that also exhibit anticancer and antimicrobial activities

Inhibition-based biosensor for cyanide detection – a preliminary study

Modification of ZnO nanoparticles with silanes enables their application as anticancer agents

Dental Medicine and Dental Prothesis

Dental Medicine

Antibiotic prophylaxis for dental procedures: Do dental students know enough?

Assessment of the relationship between oral health-related quality of life (OHRQoL) and dental malocclusion in a Portuguese sample

Bacteriophage isolation from human saliva: a pilot study with high school students

Bitemarks analysis of orthodontically treated suspects - an identification approach

Determination of the Vertical Dimension Occlusion - Case Report

Differential Diagnosis of Developmental Defects of Enamel: a review

Effect of an antioxidant on the microtensile bond strength ($\mu$TBS) of restored teeth after dental bleaching

Effect of pH of H2O2 solutions on the morphology and wear resistance of human dental enamel: an AFM study

Effect of the saliva biomolecules on the interface zirconia/Ti6Al4V triboactivity

Evaluation of an experimental setup to analyse the intermaxillary relation in surfers

Evaluation of periodontally diseased molars based on the Miller McEntire Periodontal Prognostic Index

Evaluation of Postoperative Pain in Patients Submitted to Periodontal Surgeries

Evaluation of Self-perception of Awake Bruxism in Dentistry Students – Clinical Case Series

Evaluation of the quality of life before and after rehabilitation with dental implants: a pilot study

Evaluation of the relationship between oral health-related quality of life (OHRQoL) and skeletal malocclusion - a pilot study

How often are medication prescribed in the emergency appointment at Egas Moniz Dental University Clinic? – A pilot Study

In vitro erosive dental wear measured with a 3D intraoral scanner - a pilot study

Inflammatory Dentigerous Cyst – A Clinical Case

Influence of acid etching on internal bleaching with 16% carbamide peroxide

Influence of different antioxidant agents on the microtensile bond strength of restored teeth after bleaching

Influence of Silane Type and Application Time on the Bond Strength to Leucite Reinforced Ceramics
Low-Level Laser Therapy in neurosensory recovery - Case series approach in dental and maxillofacial rehabilitation  
Marginal Microleakage of Flowable Resin Composites Used to Adhere Semi-Direct Restorations  
Multidisciplinary Team in Temporomandibular Disorders  
My Tooth is Ill: About the Mental Representation of the concept of caries in children (Phase I)  
Oral Health goes to school  
Patologia Degenerativa da ATM: Do conservador ao minimamente invasivo - caso clinico  
Prevalence of imperfect amelogenesis cases in a paediatric population of the paediatric dentistry clinic of IUEM  
Restorative Materials Without Bis-Gma – Myth or Reality?  
Sleep Bruxism: the complexity of a definitive diagnosis – Case Report  
Teeth discolouration and prescribed slimming magistral formula: a case report  
The child’s self-perception about Dental Decay in the change of Deciduous Teeth  
The Egas Moniz Histology Digital Platform – a dream that came true  
The prevalence of patients with rheumatic diseases and its periodontal condition: data from a population-based study in the Lisbon Metropolitan Area  
Translucency evaluation of an ultra-translucent monolithic zirconia and a super translucent multilayer zirconia: a pilot study on the thickness effect  
Translucency of HT lithium disilicate specimens with different thicknesses - Preliminary study  
Treatment of infra-bony periodontal defects using a collagen membrane and a bone substitute of equine origin – a pilot study  
Vascular Risks in External Sinus Lifts: an Anatomical Approach  
Vital pulp therapy in a 9-years-old patient: a clinical case  
What Is the Best Etching Timing in a Resin Infiltrant used on Enamel Surface After Remineralization With CPP-ACP?  
Temporomandibular disorders in scuba divers: A Systematic Review

**Dental Prothesis**

3D-Printing of zirconia dental prosthesis  
Association between mouth-breathing and atypical swallowing in young orthodontic patients at Egas Moniz Dental Clinic

**Environmental Sciences**

Study of Quantum Dots (CdS, ZnS) toxicity in Danio rerio: preliminary results  
Study of the effects of nanoplastics ingestion in a freshwater fish (Danio rerio)

**Forensic Sciences**

2-Phenoxyethanol derivatization in Ink dating determination  
Assessing the Content of a Package of SGT-151 Sold Online  
Genetic predisposition for aggressive behaviour related with dopamine and serotonin pathways – An overview  
Improving methodology to determine Vitamin D3 in food supplements  
Information System for Tablets Identification (ISTI)  
Saccharomyces cerevisiae as a model to study synthetic cannabinoids: the impact of using different carbon sources  
Toxicity of Synthetic Cannabinoids is Increasing Along with the Regulatory Measures Taken for their Control  
Vehicle identification from automotive paints transferred in road accidents
### Health Sciences

| Can urban gardens improve food security, health, well-being and financial sustainability of households? | S135 |
| Effect of different cooking methods on the content of total vitamin C, ascorbic acid and dehydroascorbic acid of the galega kale | S136 |
| Food intake assessment and anthropometric characterisation of teenage gymnasts | S137 |
| Influence of temperature and light on total phenolic compounds during natural orange juice storage | S137 |
| Milk related excipients in medications: concerns with cow’s milk protein allergy | S139 |
| Sexual and reproductive health: The science behind supplementation in aging | S140 |

### Pharmacy

| Title | Page |
|-------|------|
| Assessment of the stability of co-amorphous olanzapine in tablets | S141 |
Characterisation and stability of co-amorphous systems containing olanzapine and sulphonic acids
Co-formability, solubility enhancement and stability of olanzapine co-amorphous systems produced with different co-formers
Comparison of the amorphization ability of two polymorphic forms of olanzapine
Cytotoxicity of temperature-responsive cationic diblock copolymers in human cancer and non-cancer cells lines
Dosing oral-liquid azithromycin suspensions: do users follow instructions?
Evaluation of antibiotic prophylaxis use in a University Dental clinic in the Lisbon Area
In vivo study on the performance of therapeutic intraocular lens loaded with an antibiotic and an anti-inflammatory
Magistral slimming: what are the risks?
Polyhexanide and chlorhexidine loaded chitosan wound dressings
Resistance Associated Mutations to Protease Inhibitors on HIV-2 infected patients in Portugal
Vitamin D in Liquid Food Supplements: are labels in line with RDA?

Psychology: Clinical and Forensic
Clinical Psychology
Are the self-esteem and the adult attachment affected by previous experiences of youth victimisation?
Do difficulties in emotion regulation impact self-esteem and adult attachment? - The role of trauma
Polyvictimization among a juvenile Portuguese sample
Predictors of peer victimisation in the context of secondary school
The impact of childhood abuse on adult self-esteem and emotional regulation

Forensic Psychology
Elder Abuse: The Hidden Face of Domestic Violence
Inmates’ empathy: Relationship with childhood victimisation
Interpersonal Reactivity: The Impact of Infant-Juvenile Positive Experiences
Intimate partner homicide: victims and the dynamics of victim - perpetrator relationship
Preliminary Validation of Bumby Rape and Molest Scales: Exploratory Factorial Analysis
The reflex of the past – The role of youth victimisation trauma on the interpersonal reactivity
Traumatic experiences in a lifetime: Impact on the connection with others and the role of emotions
Violence Risk Assessment in Forensic Psychology Office: From Childhood to Elderly
Vulnerable Victims in Court: From Childhood to Senescence

Physiotherapy
Adolescent neck pain: association with the use of mobile telephone
Ageing and ethical challenges in physiotherapy: Application of the RIPS model in ethical decision-making
Analysis of factors related to shoulder instability in young handball players
Ankle stiffness assessment in individuals with Chronic Ankle Instability in dual-task
single leg stance, on an unstable surface
Benefits of a Virtual Environment Program at the level of Functional Physical Fitness in Non-Institutionalized Elderly
Physical Fitness in Non-Institutionalized Elderly
Benefits of Condylar Distraction in Patients with Temporomandibular Dysfunction
Central Synthesis of Temporomandibular Dysfunction
Effect of a single dry needling session in Temporomandibular Disorders
Effect of auditory neurosensorial stimulation in gait pattern after acute stroke
Elderly: Health services and human resources requirements in Portugal
Estimating Anatomically Plausible Segment Orientations using a Kinect One Sensor
Functional capacity and health status in patient chronic obstructive pulmonary disease
Infant massage programs for newborn babies: Systematic Review
Modulation of ankle antagonist co-activation during the transition from upright standing to gait and to sit in post-stroke subjects
On the Potential of Virtual Reality for Locomotion Rehabilitation
Predictors of physical fitness and Health-Related Quality of Life based on anthropometrics characteristics and exercise stress test performance in cardiac rehabilitation
Professional Competences of the Physiotherapists in the field of Mental Health in Portugal: a questionnaire based survey
Psychosocial aspects in Temporomandibular Disorder: a case report
Relationship between handedness and the incidence of spinal changes in the frontal plane: evaluation using Idiag® Spinal Mouse®
Relationships between respiratory parameters and quadriceps strength in subjects with chronic obstructive pulmonary disease
The Skin temperature under multilayer bandages during exercise
Sports Injuries Patterns in Children and Adolescents According to Their Level of Sports Participation, Age and Maturation
Sports Practice and Foot Pressure in Children and Teenagers from 10 to 18 Years Old: Evaluation performed using Namrol® Podoprint®
Strategies to manage anterior disc displacement without reduction of temporomandibular joint: a case report
The effect of progressive aerobic, resistance and stretching exercise combined with education on body weight among breast cancer survivors
Translation of Professionalism in Physical Therapy questionnaire for Portuguese of Portugal: Core values

Public Health
Accessing the potential impact of education about cancer screening programs: a pilot before and after study
Management of clinical relevant drug-drug interactions with antipsychotics in nursing homes
Oral Anticoagulation on patients with atrial fibrillation: are we doing a good job?

Sociology and Social Sciences
Medications in workplace – a literature review
