Fig. S2 Association between prognosis and CCL2 expression plus the correlation between ELOVL5 and CCL2 in RCC patients. (A) Kaplan-Meier curves of the overall survival of 530 ccRCC patients from a TCGA analysis according to CCL2 expression levels. The expression level was divided as seen in Figure 1. (B) A scatterplot for the correlation between ELOVL5 and CCL2 was generated using normalized expression values of ELOVL5 and CCL2 obtained from the TCGA data. Both Spearman correlation (r) and statistical significance of r were analyzed.
