**Supplementary Table 1.** Concomitant medications

| Medication             | Patients (%) |
|------------------------|--------------|
| Calcium antagonists    | 26           |
| Beta Blockers          | 60           |
| ACE-I                  | 19           |
| ARB                    | 16           |
| Nitrates               | 21           |
| Diuretics              | 12           |
| Hypoglycemic Agents    | 16           |
| Statins                | 65           |
| Anti-Platelets         | 63           |
| Aspirin                | 65           |
| Anticoagulants         | 5            |
| (3-KAT) inhibitor      | 21           |
| Other drugs            | 35           |

ACE-I: angiotensin-converting enzyme inhibitor  
ARB: Angiotensin receptor blockers  
3-KAT: 3-ketoacyl coenzyme A thiolase
