Supplementary Figure S1. Distribution of ADRD codes by month in 2020 vs. 2019
Supplementary Table S1. Association between demographic characteristics and ADRD diagnosis via telehealth (phone and video) vs. face-to-face encounters.

|                          | Encounters/Total | Odds Ratio (95% CI) | P-value |
|--------------------------|------------------|---------------------|---------|
| **Univariate Logistic Regression Models** |                  |                     |         |
| **Age**                  |                  |                     |         |
| 65-74                    | 270/738          |                     |         |
| 75-84                    | 654/1698         | 1.09 (0.91-1.30)    | 0.37    |
| >=85                     | 656/1412         | 1.50 (1.25-1.81)    | <.0001  |
| **Gender**               |                  |                     |         |
| Male                     | 625/1603         |                     |         |
| Female                   | 955/2245         | 1.16 (1.02-1.32)    | 0.03    |
| **Race/Ethnicity**       |                  |                     |         |
| White                    | 783/1944         |                     |         |
| Asian/Pacific Islander   | 144/353          | 1.02 (0.81-1.29)    | 0.86    |
| Black                    | 221/507          | 1.15 (0.94-1.40)    | 0.18    |
| Hispanic                 | 432/1044         | 1.05 (0.90-1.22)    | 0.56    |
| **Spoken Language**      |                  |                     |         |
| English                  | 1322/3228        |                     |         |
| Non-English              | 258/620          | 1.03 (0.86-1.22)    | 0.76    |
| **Multivariable Logistic Regression Model** |                  |                     |         |
| **Age**                  |                  |                     |         |
| 65-74                    | 270/738          |                     |         |
| 75-84                    | 654/1698         | 1.08 (0.90-1.29)    | 0.39    |
| >=85                     | 656/1412         | 1.50 (1.25-1.80)    | <.0001  |
| **Gender**               |                  |                     |         |
| Male                     | 625/1603         |                     |         |
| Female                   | 955/2245         | 1.13 (0.99-1.29)    | 0.07    |
| **Race/Ethnicity**       |                  |                     |         |
| White                    | 783/1944         |                     |         |
| Asian/Pacific Islander   | 144/353          | 1.02 (0.80-1.29)    | 0.89    |
| Black                    | 221/507          | 1.16 (0.95-1.42)    | 0.14    |
| Hispanic                 | 432/1044         | 1.06 (0.88-1.27)    | 0.56    |
| **Spoken Language**      |                  |                     |         |
| English                  | 1322/3228        |                     |         |
| Non-English              | 258/620          | 1.03 (0.84-1.28)    | 0.75    |
