On the Positive Definite Solutions of Nonlinear Matrix Equation

Authors: Tian baoguang, Liang chunyan, and Chen nan

Abstract: In this paper, the nonlinear matrix equation is investigated. Based on the fixed-point theory, the boundary and the existence of the solution with the case are discussed. An algorithm that avoids matrix inversion with the case is proposed.

Keywords: Nonlinear matrix equation, Positive definite solution, The maximal-minimal solution, Iterative method, Free-inversion.

Conference Title: ICEP 2014: International Conference on Electronic Publications
Conference Location: Journal city, WASET
Conference Dates: November 23-23, 2014
