### CARE Checklist of information to include when writing a case report

| Topic                      | Item | Checklist item description                                                                                           | Reported on Line |
|----------------------------|------|-----------------------------------------------------------------------------------------------------------------------|------------------|
| Title                      | 1    | The diagnosis or intervention of primary focus followed by the words “case report”                                     | √                |
| Key Words                  | 2    | 2 to 5 key words that identify diagnoses or interventions in this case report, including “case report”                 | √                |
| Abstract (no references)   | 3a   | Introduction: What is unique about this case and what does it add to the scientific literature?                      | √                |
|                            | 3b   | Main symptoms and/or important clinical findings                                                                     | √                |
|                            | 3c   | The main diagnoses, therapeutic interventions, and outcomes                                                          | √                |
|                            | 3d   | Conclusion—What is the main “take-away” lesson(s) from this case?                                                    |                 |
| Introduction               | 4    | One or two paragraphs summarizing why this case is unique (may include references)                                  | √                |
| Patient Information        | 5a   | De-identified patient specific information.                                                                          |                 |
|                            | 5b   | Primary concerns and symptoms of the patient                                                                          |                 |
|                            | 5c   | Medical, family, and psycho-social history including relevant genetic information                                      |                 |
|                            | 5d   | Relevant past interventions with outcomes                                                                            |                 |
| Clinical Findings          | 6    | Describe significant physical examination (PE) and important clinical findings.                                       | √                |
| Timeline                   | 7    | Historical and current information from this episode of care organized as a timeline                                  |                 |
| Diagnostic Assessment      | 8a   | Diagnostic testing (such as PE, laboratory testing, imaging, surveys).                                               | √                |
|                            | 8b   | Diagnostic challenges (such as access to testing, financial, or cultural)                                            |                 |
|                            | 8c   | Diagnosis (including other diagnoses considered)                                                                      |                 |
|                            | 8d   | Prognosis (such as staging in oncology) where applicable                                                              |                 |
| Therapeutic Intervention   | 9a   | Types of therapeutic intervention (such as pharmacologic, surgical, preventive, self-care)                           | √                |
|                            | 9b   | Administration of therapeutic intervention (such as dosage, strength, duration)                                       |                 |
|                            | 9c   | Changes in therapeutic intervention (with rationale)                                                                  |                 |
| Follow-up and Outcomes     | 10a  | Clinician and patient-assessed outcomes (if available)                                                                | √                |
|                            | 10b  | Important follow-up diagnostic and other test results                                                                  |                 |
|                            | 10c  | Intervention adherence and tolerability (How was this assessed?)                                                     |                 |
|                            | 10d  | Adverse and unanticipated events                                                                                     |                 |
| Discussion                 | 11a  | A scientific discussion of the strengths AND limitations associated with this case report                           | √                |
|                            | 11b  | Discussion of the relevant medical literature with references                                                       | √                |
|                            | 11c  | The scientific rationale for any conclusions (including assessment of possible causes)                             | √                |
|                            | 11d  | The primary “take-away” lessons of this case report (without references) in a one paragraph conclusion               |                   |
| Patient Perspective        | 12   | The patient should share their perspective in one to two paragraphs on the treatment(s) they received                | Yes √ No □      |
| Informed Consent           | 13   | Did the patient give informed consent? Please provide if requested                                                   |                 |
