PAPERS

Distributed Control of Low-Voltage Resistive AC Microgrids ........................................ M. S. Golsorkhi, Q. Shafiee, D. D.-C. Lu, and J. M. Guerrero .......................................................... 573

Improvement of Identification Procedure Using Hybrid Crow Search Algorithm for Turbine-Governor and Excitation System ............................................... T. Hosomeizadeh, S. M. Salamati, S. A. Salamati, and G. B. Gharahpetian ..................................................... 585

A Physically-Based Electrical Model for Lithium-Ion Cells ................................................ C. Brivio, V. Musolino, M. Merlo, and C. Balki ................................................................. 594

Enhanced Emotional and Speed Deviation Control of Synchronous Reluctance Motor Drives ................................................................. E. Daryabeigi, A. Mirzai, H. A. Zarchi, and S. Vaez-Zadeh ................................................................. 604

Transversally Asymmetric Stiffness of Laminated Stator Core: A Solution for Noise Mitigation of Electric Machines ................................................................. F. Chauvicourt, C. Faria, W. Desmet, and J. J. C. Gyselinck ............................................................. 613

On the Cross Coupling Effects in Structural Response of Switched Reluctance Motor Drives ................................................................. M. Kimpara, S. Wang, R. Reis, J. Pinto, M. Moallem, and B. Fahimi ................................................................. 620

Design and Control of a Novel Yokeless Axial Flux-Switching Permanent-Magnet Motor ................................................................. J. R. Fard and M. Ardehli ................................................................. 631

Reduction of Torque Ripple in Consequent-Pole Permanent Magnet Machines Using Staggered Rotor ................................................................. J. Li, K. Wang, and F. Li ................................................................. 643

Multiscale Induction Machine Modeling in the dq0 Domain Including Main Flux Saturation ................................................................. Y. Xia, Y. Chen, H. Ye, and K. Struz ................................................................. 652

Analysis of High Gear Ratio Capabilities for Single-Stage, Series Multistage, and Compound Differential Coaxial Magnetic Gears ................................................................. M. C. Gardner, M. Johnson, and H. A. Toliyat ................................................................. 665

Performance Analysis of Self-Excited Reluctance Generating System Using Power Balance ................................................................. Y. Wang and N. Bianchi ................................................................. 673

A New Double-Sided Linear Flux-Switching Permanent Magnet Motor With Yokeless Mover for Electromagnetic Launch System ................................................................. R. Cao, J. Jin, Z. Zhang, and M. Cheng ................................................................. 680

A Cylindrical Linear Permanent Magnet Vernier Hybrid Machine for Wave Energy ........................................................................................................... N. J. Baker, M. A. H. Rahian, and A. A. Almoraya ................................................................. 691

Comparative Study of Consequent-Pole and Hybrid-Pole Permanent Magnet Machines ................................................................. J. Li, K. Wang, and C. Liu ................................................................. 701

Modeling and Tuning of an Improved Delayed-Signal-Cancellation PLL for Microgrid Application ................................................................. M. Rashiduzzaman and J. W. Kimball ................................................................. 712

Design of a Robust Five-Phase Ferrite-Assisted Synchronous Reluctance Motor With Low Demagnetization and Mechanical Deformation ................................................................. M. Z. Islam, A. Arafat, S. S. R. Bonthu, and S. Choi ................................................................. 722

Multiple Reference Frame-Based Extended Concentrated Wound PMSM Model Considering PM Flux Linkage and Inductance Harmonics ................................................................. H. Dhulipati, S. Mukanand, C. Lai, K. Mukherjee, J. Tjong, and N. C. Kar ................................................................. 731

Formulation of Rectifier Numerical Average-Value Model for Direct Interface With Inductive Circuitry ................................................................. Y. Q. Zhang and A. M. Cramer ................................................................. 741

Pole Placement Control for Doubly-Fed Induction Generators Using Compact Representations in Complex Variables ................................................................. H. J. Baesmat and M. Bodson ................................................................. 750

A Wavelet-Based Fault Diagnosis Approach for Permanent Magnet Synchronous Motors ................................................................. M. Heydarzadeh, M. Zafarani, M. Nourani, and B. Akin ................................................................. 761

Improving the Thermal Performance of Rotary and Linear Air-Cored Permanent Magnet Machines for Direct Drive Wind and Wave Energy Applications ................................................................. M. A. Mueller, J. Burchell, Y. C. Chong, O. Kevsan, A. McDonald, M. Galbraith, and E. J. P. E. Subiabre ................................................................. 773

A Noninvasive External Flux Based Method for In-Service Induction Motors Torque Estimation ................................................................. M. O. Younis, J.-P. Lecointe, O. Ninet, F. Morganti, J.-F. Brudny, and F. Zidat ................................................................. 782

Adaptive Extended Kalman Filter for Speed-Sensorless Control of Induction Motors ................................................................. E. Zerdali ................................................................. 789

(Content Continued on Back Cover)
Optimal Sizing of Energy Storage Systems for Shipboard Applications .................. A. Boveri, F. Silvestro, M. Molinas, and E. Skjong 801
Magnetizing Inductance Determination in a Six-Phase Induction Machine .................. B. M. Brkovic, L. B. Ristic, M. V. Terzie, A. V. Stankovic, and Z. M. Lazarevic 812
Reduced-order Aggregate Model for Parallel-connected Single-phase Inverters .............. V. Purba, B. B. Johnson, M. Rodriguez, S. Jafarpour, F. Bullo, and S. V. Dhople 824
Stability Analysis and Enhancement of Type-4 Wind Turbines Connected to Very Weak Grids Under Severe Voltage Sags .................. H. Yuan, H. Xin, L. Huang, Z. Wang, and D. Wu 838
Sub-Synchronous Resonance Damping Control for Series-Compensated DFIG-Based Wind Farm With Improved Particle Swarm Optimization Algorithm .................. J. Yao, X. Wang, J. Li, R. Liu, and H. Zhang 849
Stand-Alone DFIG FOC Sensitivity and Stability Under Mismatched Inductances ........... I. Erazo-Damián, J. M. Aspes, R. Perini, M. F. Iacchetti, and G. D. Marques 860
Induction Motors Fault Detection Using Square-Root Transformed Cubature Quadrature Kalman Filter .................. J. Zarei, E. Kowsari, and R. Razavi-Far 870
Demand Side Management Strategy for Droop-Based Autonomous Microgrids Through Voltage Reduction .................. A. Adelible, H. H. Zeineldin, M. A. Hosani, and E. F. El-Saadany 878
Optimal Number of Magnet Pieces of Flux Reversal Permanent Magnet Machines ........ H.-Y. Li and Z. Q. Zhu 889
Continuous Voltage Vector Model-Free Predictive Current Control of Surface Mounted Permanent Magnet Synchronous Motor .................. Y. Zhou, H. Li, R. Liu, and J. Mao 899
Design Optimization of Double-Sided Permanent-Magnet Axial Eddy-Current Couplers for Use in Dynamic Applications .................. V. Aberoomish, M. Mirtsalam, and R. Fesharaki 909
A Sliding Mode Control Approach for Gas Turbine Power Generators .................. A. Bonfiglio, S. Cucchiniarme, M. Invernizzi, D. Lanzorotto, A. Palmieri, and R. Procopio 921
Field Validation of Generic Type 4 Wind Turbine Models Based on IEC and WECC Guidelines .................. A. Lorenzo-Bonache, A. Honrubia-Escribano, F. Jiménez-Buendia, and E. Gómez-Lázaro 933
Rotor Resistance Estimation for Induction Machines Using Carrier Signal Injection With Minimized Torque Ripple .................. A. Hasanzadeh, D. M. Reed, and H. F. Hofmann 942
Efficiency Extreme Point Tracking Strategy Based on FFRLS Online Identification for PEMFC System .................. T. Wang, Q. Li, Y. Qin, L. Yin, L. Liu, and W. Chen 952
Diagnosis for PEMFC Based on Magnetic Measurements and Data-Driven Approach .................. Z. Li, C. Cadet, and R. Outib 964
Challenges of Finite Element Analysis of Resolvers .................. H. Saneti, R. Alipour-Sarabi, Z. Nasiri-Gheidari, and F. Tootoonchian 973
Analytical Expressions of Isolation Indicators for Permanent-Magnet Synchronous Machines Under Stator Short-Circuit Faults .................. Y. Ge, B. Song, Y. Pei, Y. A. B. Mollet, and J. J. C. Gyselinck 984
Expansion of the Feasible Slot/Pole Combinations in the Fractional Slot PM Machines by Applying Three-Slot Pitch Coils .................. P. Jalali, S. T. Boroujeni, and J. Khoshirrash 993
On the Impedance Modeling and Equivalence of AC/DC-Side Stability Analysis of a Grid-Tied Type-IV Wind Turbine System .................. Y. Ge, B. Song, Y. Pei, Y. A. B. Mollet, and J. J. C. Gyselinck 1000
Stability and Power Quality Enhancement Strategy for DFIG System Connected to Harmonic Grid With Parallel Compensation .................. H. Nian and B. Pang 1010
Torque Calculation of Five-Phase Interior Permanent Magnet Machine Using Improved Analytical Method .................. S. Yang, D. Ding, X. Li, Z. Xie, Z. Zhang, and L. Chang 1033
A Decoupling Estimation Scheme for Rotor Resistance and Mutual Inductance in Indirect Vector Controlled Induction Motor Drives .................. G. Liu, L. Liu, Q. Chen, and W. Zhao 1023
Distributed Consensus for Output Power Regulation of DFIGs With On-Site Energy Storage .................. J. Khazaee and D. H. Nguyen 1043
Multi-Objective Controller Design of IPMSM Drives Based on DTD D-Partition Method Considering Parameters Uncertainties .................. H. Li, X. Zhang, S. Yang, E. Li, and J. Hong 1052
Efficient Direct-Model Predictive Control With Discrete-Time Integral Action for PMSGs .................. M. Abdelrahem, C. M. Hackl, R. Kennel, and J. Rodriguez 1063
Novel Equivalent Circuit Model and Theoretical Analysis of Doubly Fed Machine .................. K. Yu and P. Tang 1073
Effect of Local Tangential Force on Vibration Performance in Fractional-Slot Concentrated Winding Permanent Magnet Synchronous Machines .................. H. Lan, J. Zou, Y. Xu, and M. Liu 1082
Comparative Studies of Torque Performance Improvement for Different Doubly Salient Synchronous Reluctance Machines by Current Harmonic Injection .................. G. J. Li, K. Zhang, Z. Q. Zhu, and G. W. Jewell 1094
Optimization of Offshore Direct Drive Wind Turbine Generators With Consideration of Permanent Magnet Grade and Temperature .................. N. A. Bhuiyan and A. McDonald 1105
A Novel Multiple Correction Approach for Fast Open Circuit Voltage Prediction of Lithium-Ion Battery .................. J. Meng, D.-I. Stroe, M. Ricco, G. Luo, M. Swierczynski, and R. Teodorescu 1115
Harmonic Instability Analysis and Suppression Method Based on α/β-Frame Impedance for Trains and Network Interaction System .................. H. Tao, H. Hu, X. Zhu, Y. Zhou, and Z. He 1124
Torque Density Enhancement of 6/4 Variable Flux Reluctance Machine With Second-Harmonic Current Injection .................. J. Feng, L. Huang, Z. Q. Zhu, S. Guo, and J. Shi 1135
