Feature: Cutting edge researches on electroceramics, 2015

Preface

Full papers

Influence of temperature and humidity on the electrical sensing of Pt/WO₃ thin film hydrogen gas sensor
Yuki YAMAGUCHI, Shunji IMAMURA, Keishi NISHIO and Kenjiro FUJIMOTO
P6-1

Strong interaction between ferroelectric polarization and oxygen vacancy in BiFeO₃ thin film capacitors
Hiroki MATSUO, Yuuki KITANAKA, Yuji NOGUCHI and Masaru MIYAYAMA
P6-2

Synthesis and characterization of barium titanate-based solid solution nanocubes
Ken-ichi MIMURA, Qiang MA and Kazumi KATO
P6-3

Diffusion behavior of Ag electrodes into (Bi₁/₂Na₁/₂)TiO₃ ceramics
Naoki IWAGAMI, Hajime NAGATA, Isao SAKAGUCHI and Tadashi TAKENAKA
P6-4

Dielectric properties of BaTiO₃–Bi(Mg₁/₂Ti₁/₂)O₃ films with preferential crystal orientation
Shota MOKI, Junichi KIMURA, Hiroshi FUNAKUBO and Hiroshi UCHIDA
P6-5
Development and electrical properties of wurtzite (Al,Ti)N materials for thin film thermistors
Toshiaki FUJITA, Hiroshi TANAKA, Hitoshi INABA and Noriaki NAGATOMO
653

In situ time-resolved dispersive X-ray absorption fine structure analysis of BaTiO3–LiCoO2 composites for lithium ion batteries
Takashi TERANISHI, Yumi YOSHIKAWA, Ryota MIYAHARA, Hidetaka HAYASHI, Akira KISHIMOTO, Misaki KATAYAMA and Yasuhiro INADA
659

Wideband dielectric spectroscopy of (Sr0.7Bi0.2)TiO3 ceramics and its microscopic mechanism of polarization
Motoharu SAKURAI, Kazuki KANEHARA, Hiroaki TAKEDA, Takaaki TSURUMI and Takuya HOSHINA
664

Gas sensing properties of c-axis-oriented Al-incorporated ZnO films epitaxially grown on (1120) sapphire substrates using pulsed laser deposition
Yutaka ADACHI, Ken WATANABE, Noriko SAITO, Isao SAKAGUCHI and Taku T. SUZUKI
668

Effect of orientation and density of hydroxide precursor films on performance of dye-sensitized ZnO solar cells
Hisasuke KAJIHARA, Manabu HAGIWARA and Shinobu FUJIHARA
673

Synthesis, crystal structure and conductive properties of garnet-type lithium ion conductor Al-free Li7−xLa3Zr2−xTa2xO12 (0 ≤ x ≤ 0.6)
Naoki HAMAO, Kunimitsu KATAOKA, Norihito KIJIMA and Junji AKIMOTO
678

TLP analysis of variation in ESD performance by co-firing with copper electrodes in SrCoO3 doped-ZnO based multilayer varistors
Yoshiko HIGASHI and Eiichi KOGA
684

Solid state epitaxy of (Hf,Zr)O2 thin films with orthorhombic phase
Takanori KIGUCHI, Shogo NAKAMURA, Akihiro AKAMA, Takahisa SHIRAISHI and Toyohiko J. KONNO
689
| Title                                                                 | Authors                                                                 | Page |
|----------------------------------------------------------------------|-------------------------------------------------------------------------|------|
| Effects of substrate surface composition and deposition temperature on deposition of flat and continuous Ru thin films | Hirokazu CHIBA, Masaki HIRANO, Kazuhisa KAWANO, Noriaki OSHIMA and Hiroshi FUNAKUBO | 694  |
| Atomic-resolution analysis for the effects of heat treatment temperatures on the growth of chemically-ordered regions in Pb(Mg1/3Nb2/3)O3 thin films | Cangyu FAN, Takanori KIGUCHI, Akihiro AKAMA and Toyohiko J. KONNO          | 697  |
| Mechanoluminescence properties of red-emitting piezoelectric semiconductor MZnOS:Mn^{2+} (M = Ca, Ba) with layered structure | Dong TU, Dengfeng PENG, Chao-Nan XU and Akihito YOSHIDA                   | 702  |
| Single crystal synthesis, crystal structure and electrochemical property of spinel-type LiCoMnO4 as 5 V positive electrode materials | Yuki HAMADA, Naoki HAMAO, Kunimitsu KATAOKA, Naoya ISHIDA, Yasushi IDEMOTO and Junji AKIMOTO | 706  |
| Soft chemical synthesis and crystal structure of novel hydrogen titanium oxide H2Ti12O25 | Kunimitsu KATAOKA and Junji AKIMOTO                                       | 710  |

**Technical report**

| Title                                                                 | Authors                                                                 | Page |
|----------------------------------------------------------------------|-------------------------------------------------------------------------|------|
| Evaluation of sensor property for hydrogen and ethanol of zinc-doped tin-dioxide thin films fabricated by rf sputtering | Isao SAKAGUCHI, Noriko SAITO, Ken WATANABE, Yutaka ADACHI and Taku T. SUZUKI | 714  |

**Regular Issue**

| Title                                                                 | Authors                                                                 | Page |
|----------------------------------------------------------------------|-------------------------------------------------------------------------|------|
| Structural change of Na2O-doped SiO2 glasses by melting               | Yoshihiro SAIITO, Takumi YONEMURA, Atsunobu MASUNO, Hiroyuki INOUE, Koji OHARA and Shinji KOHARA | 717  |
◆ Full papers ◆
Improvement of crystallinity and surface roughness in epitaxial CeO$_2$/Ce$_{1-x}$Zr$_x$O$_2$/Y$_{0.15}$Zr$_{0.85}$O$_{1.93}$ buffer layers deposited on a Si(100) substrate by pulsed laser deposition
Wataru AIHARA, Tadashi SHIOTA, Osamu SAKURAI and Kazuo SHINOZAKI
721

Preparation of polycrystalline high temperature refractory mullite fibers via precursor method
Lina QIU, Lu TONG, Aijun GONG, Fukai Li and Yu LIU
725

Temperature dependence of unipolar fatigue behavior of lead-free alkali niobate ceramics
Alexander MARTIN, Ken-ichi KAKIMOTO, Keiichi HATANO and Yutaka DOSHIDA
730

Synthesis and characterization of calcium hydroxyapatite (Hap) and Ti(IV)-substituted Hap particles by forced hydrolysis of Ca(OH)$_2$–Na$_4$P$_2$O$_7$ solution
Kazuhiko KANDORI and Mika NAKANISHI
737

Theoretical approaches for studying anisotropic negative thermal expansion: A case of cordierite
Takero TOKIZONO, Yusuke TSURU, Teruo ATSUMI, Norikazu HOSOKAWA and Toshiharu OHNUMA
744

◆ Technical report ◆
Powder layer manufacturing of alumina ceramics using water spray bonding
Mikinori HOTTA, Akihiro SHIMAMURA, Naoki KONDO and Tatsuki OHJI
750

◆ Notes ◆
Formation process of apatite layer on titanium-coated silicon wafer surfaces
Haruna SAWAGUCHI, Jiale XU, Takahiro KAWAI, Takashi MINETA and Yoshimune NONOMURA
753
Supplement

Evaluation of origin place of corbicula japonica using fluorescence properties of samples by firing shells [in Japanese]

Hidetoshi MIYAZAKI, Takumi ISHIGAKI, Shogo SUGAHARA, Michiko EGAWA, Yasushi SEIKE, Junko FUJIWARA and Toshitaka OTA
