Fröb, Markus B.; Lima, William C. C.
Cosmological perturbations and invariant observables in geodesic lightcone coordinates.
(English) | Zbl 07488040
J. Cosmol. Astropart. Phys. 2022, No. 1, Paper No. 34, 38 p. (2022)

MSC:
83C40 Gravitational energy and conservation laws; groups of motions
83F05 Relativistic cosmology
35B20 Perturbations in context of PDEs
57R25 Vector fields, frame fields in differential topology
53D25 Geodesic flows in symplectic geometry and contact geometry
70S15 Yang-Mills and other gauge theories in mechanics of particles and systems

Keywords:
cosmological perturbation theory; cosmological perturbation theory in GR and beyond; inflation

Full Text: DOI arXiv

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
