Consent Form to Participate in Research for CovIdentify

This study is being conducted by Dr. Jessilyn Dunn, PhD and Dr. Ryan Shaw, RN, PhD of the Duke University Department of Biomedical Engineering and Schools of Nursing and Medicine.

Key Information

"CovIdentify" is a new study to help researchers detect COVID-19 infection. Anyone who has a computer or smartphone, and is over the age of 18 can participate. If you have a smart watch or wearable device, you can choose to contribute data from the device (Not required to participate). Participation is completely your choice. We are asking people all over the world to join our COVID-19 study. We will collect daily or weekly surveys that ask how you have been feeling and about social distancing. The information we gather will be kept in databases on password-protected servers.

WHY IS THIS STUDY BEING DONE?

We have learned how to use smart watch data to detect early signs of illness. We are doing this study to help us learn more about COVID-19.

WHAT WILL I BE ASKED TO DO?

You will be asked to provide informed consent, complete a baseline survey about yourself, and then brief daily or weekly surveys on social distancing and testing. If you have a wearable device, you will be asked to contribute data such as heart rate and activity. All survey questions can be completed on a smartphone, tablet, or laptop/computer.

HOW LONG WILL I BE IN THE STUDY?

This study will last up to 12 months. You may decline to answer any questions or the entire survey or withdraw from the study at any time.

Risks

If a survey question makes you feel uncomfortable, you may choose not to answer it. Every effort will be made to keep your information confidential. The information we gather will be kept in databases on password-protected servers. When we report what we learn from this study, no individual study participant will be identifiable. Data from this study may be used for future research, but in a way that no individual participant will be identifiable.

Benefits

Participation in this study may be of no benefit to you. We hope information learned from this study will help with COVID-19 research. We will not provide you with information about your chances of having or getting the virus.

WHAT ABOUT COMPENSATION?

Participants in this study can purchase a Fitbit or Garmin device at a discount while supplies last. Depending on your risk of contracting COVID-19, you may be eligible to receive a smart watch as a part of this study. Please email coidentify@duke.edu to learn more.
WILL MY INFORMATION BE KEPT CONFIDENTIAL?

Data will be stored on Duke’s protected network and approved cloud services and is only available to approved research personnel. Only the researchers on this study will have access to your information. Your survey responses and device data will be given a study ID number. The key that connects your study ID number with your identifying information, for example, your name or email address, will be stored separate from your survey responses and device data. We will not analyze data on an individual level (i.e., for each participant). The data may be used in future analyses by the study investigators and in aggregate with other investigators to discover needs related to COVID-19.

It is important that you review and understand the terms and conditions for using your wearable device. You must agree to their terms of service and download the respective companion apps.

For Apple users, see https://www.apple.com/privacy/
For Fitbit users, see https://www.fitbit.com/legal/privacy-policy
For Garmin users, see https://www.garmin.com/en-US/privacy/connect/

For Fitbit, Garmin, and Android users, we will ask you to provide an email address and cell phone number associated with these devices which we will store securely.

We do not collect GPS data or real-time location data. You have the option of telling us your address, and this information will be used by Duke researchers to understand the spread of COVID-19 over time, and how location corresponds to risk of infection.

VOLUNTARY NATURE OF PARTICIPATION

Participation in this study is voluntary. You can choose not to participate at any point and may withdraw at any time. Please opt-out from communications or delete the CovIdentify app and notify the study staff if you wish to withdraw. After withdrawal, CovIdentify will no longer obtain further information from you, but still has permission to use the information collected previously.

CONTACT FOR FUTURE STUDIES

The information we obtain in this study may be used again in future research related to CovIdentify. Please check the box if you wish to be re-contacted for future research opportunities.

| ☐ | Please re-contact me about future research opportunities such as the impact of the pandemic on autoimmune disease, risk factors such as diabetes or hypertension, or the use of wearable devices. |

WHOM DO I CALL IF I HAVE QUESTIONS OR PROBLEMS?

For questions about the study, please contact the study team at covidentify@duke.edu or Dr. Jessilyn Dunn at 919-668-9798 during regular business hours. For questions about your rights as a participant in this research study, contact the Duke Campus IRB at 919-684-3030 or campusirb@duke.edu.

PARTICIPATION WHILE TRAVELING IN THE EUROPEAN ECONOMIC AREA (EEA: AN EXTENSION OF THE EUROPEAN UNION) UNDER THE GENERAL DATA PROTECTION REGULATION (GDPR) AND STATEMENT OF CONSENT
If you live in or are traveling in specific regions of Europe (the European Economic Area, or EEA), you are subject to additional data protection laws called "General Data Protection Regulations" (GDPR). To participate in our study, you must check the box below. By checking the box, you give us permission to collect and process your sensitive personal data while you are in the EEA, as well as transfer your data to the United States.

If you are in or travel to the EEA during this study, we are required to inform you that sensitive personal data about you, including racial or ethnic origin, genetic or biometric information, and health information, will be collected.

☐ [ ] I have read the consent form and I wish to participate in the study AND I consent to the collection and transfer of my personal data, including my sensitive personal data, if I am traveling to or living in the EEA during the course of this study.

If you agree to take part in the study, please sign and date below.

Enrollment

Thanks for giving us some background.

These questions are essential to help our research team identify symptoms of COVID-19 infection and validate results.

Do you actively use a wearable device (e.g. Fitbit, Garmin, or Applewatch)?

○ {1} Yes  ○ {0} No

Which wearable device brands do you use most frequently?

○ {1} Fitbit
○ {2} Apple Watch
○ {3} Garmin
○ {555} Other

Specify Other

(Check all that apply)

COVID-19 Testing

Have you ever been tested for COVID-19?

○ {1} Yes  ○ {0} No  ○ {999} I don't know

How many times have you tested positive for COVID-19?

○ {1} 0 (never tested positive)
○ {2} 1  ○ {3} 2 or more times

What were the dates of positive COVID testing (e.g. day of nasal swab)? List up to three most recent test dates.

What was the date of the first COVID-19 test?

_____________________________________________________

What type of test was it?

○ {1} Antigen (rapid 15 minute test)
○ {2} Diagnostic (PCR)
○ {3} Antibody (via blood draw)
○ {4} Don't know

What was the date of the second COVID-19 test if you had one? If not, please leave it blank.

_____________________________________________________

What was the date of the third COVID-19 test if you had one? If not, please leave it blank.

_____________________________________________________
