Content

Figure S1. A phylogenetic tree for ECN-184 and related species based on ITS of rDNA sequences........................................S2
Figure S2. A phylogenetic tree for ECN-184 and related species based on D1/D2 domain of 26SrDNA sequences.........S3
Figure S3. ¹H-NMR spectrum of 1 in CDCl₃ .................................................................................................................S4
Figure S4. ¹³C-NMR and DEPT135 spectra of 1 in CDCl₃ ............................................................................................S5
Figure S5. DQF-COSY spectrum of 1 in CDCl₃ ...............................................................................................................S6
Figure S6. HMQC spectrum of 1 in CDCl₃ .....................................................................................................................S7
Figure S7. HMBC spectrum of 1 in CDCl₃ .....................................................................................................................S8
Figure S8. NOESY spectrum of 1 in CDCl₃ ..................................................................................................................S9
Figure S9. ¹H-NMR spectrum of 2 in CDCl₃ ..................................................................................................................S10
Figure S10. ¹³C-NMR and DEPT135 spectra of 2 in CDCl₃ .............................................................................................S11
Figure S11. DQF-COSY spectrum of 2 in CDCl₃ ...........................................................................................................S12
Figure S12. HMQC spectrum of 2 in CDCl₃ ..................................................................................................................S13
Figure S13. HMBC spectrum of 2 in CDCl₃ ..................................................................................................................S14
Figure S14. NOESY spectrum of 2 in CDCl₃ ................................................................................................................S15
Figure S15. ¹H-NMR spectrum of 3 in CDCl₃ ................................................................................................................S16
Figure S16. ¹³C-NMR and DEPT135 spectra of 3 in CDCl₃ .............................................................................................S17
Figure S17. DQF-COSY spectrum of 3 in CDCl₃ ...........................................................................................................S18
Figure S18. HMQC spectrum of 3 in CDCl₃ ..................................................................................................................S19
Figure S19. HMBC spectrum of 3 in CDCl₃ ..................................................................................................................S20
Figure S20. NOESY spectrum of 3 in CDCl₃ .................................................................................................................S21
