| Variable                                      | Result         | Range     |
|-----------------------------------------------|----------------|-----------|
| Glucose mg/dl (median, IQR)                   | 10 (1.6 - 39.5) | 0 - 85    |
| Glycorrhachia/serum glucose ratio (median, IQR) | 0.05 (0.01 - 0.29) | 0.0 - 0.99 |
| Proteins g/dl (median, IQR)                   | 272.1 (115.2 - 335.4) | 13.3 - 2127 |
| Red blood cells /mm3 (median, IQR)            | 76 (15 - 838)   | 0 - 135000 |
| Leukocytes /mm3 (median, IQR)                 | 220 (36 - 1250) | 0 - 15100 |
| Polymorphonuclear /mm3 (median, IQR)          | 115.5 (32.8 - 1036.8) | 0 - 14647 |
| Mononuclear /mm3 (median, IQR)                | 20 (1.8 - 149.8) | 0 - 1850 |
| PMN predominance (%)                          | 50 (61.7%)      | -         |
| No data (%)                                   | 25 (30.9%)      | -         |

**Gram staining**

- Gram-positive cocci: 57 (70.4%) -
- Negative Gram staining: 17 (21%) -

PMN: Polymorphonuclear
