**Bing: Waves In Oceanic And Coastal**

In this book, coastal waters are waters that are shallow enough to affect the waves, adjacent to a coast, possibly with
(small) islands, headlands, tidal flats, reefs, estuaries, harbours or other features, with time-varying water levels and ambient currents (induced by tides, or river discharge). Horizontal variations in water depth cause shoaling and refraction.

**Waves in Oceanic and Coastal Waters - Knovel**

A bay is a recessed, coastal body of water that directly connects to a larger main body of water, such as an ocean, a lake, or another bay. A large bay is usually called a gulf, sea, sound, or bight. A cove is a type of smaller bay with a circular inlet and narrow entrance. A fjord is a particularly steep bay shaped by glacial activity. A bay can be the estuary of a river, such as the ...
