## CONTENTS

| Title                                                                 | Authors                                                                                      | Page |
|----------------------------------------------------------------------|----------------------------------------------------------------------------------------------|------|
| A Wide-Band Compact Quadrature Coupler on Multi-Layer Package Substrate | Umar Dilshad, Chen Chen, Amjad Altaf, Anyong Hu, and Jungang Miao                              | 1    |
| Advanced EMC Assessment of Composites Material: Monte Carlo Statistical Description with Spherical Inclusions and Improvement with SROM | Sébastien Lalliche                         | 9    |
| Wideband Low-Profile Dual-Polarized Antenna with AMC Reflector       | Alexander P. Volkov, Vitalii V. Kakshin, Igor Yu. Ryzhov, Kirill V. Kozlov and Alexander Yu. Grinev | 15   |
| A Sub-Nyquist Sampling Digital Receiver System Based on Array Compression | Tao Chen, Xutian Han, and Yongzhi Yu                                                     | 21   |
| A Compact Circularly Polarized Microstrip Ring Antenna Using a Slotted Ground for GNSS Applications | Jiade Yuan and Yujie Li                                                               | 29   |
| Wideband Ultraminiaturised-Element Frequency Selective Surface Based on Interlocked 2.5-Dimensional Structures | Mingqian Jia, Xiaoxiang He, Yang Yang, Boyu Hua, Wenxiu Hu, and Xiangyu Qian                  | 37   |
| A Novel Dual-Frequency Omnidirectional Antenna with Transmission Line Resonators Loading | Honglin Zhang, Dong Chen, Ying Yu, and Chunlan Zhao                                       | 43   |
| A Simple Numerical Solution Method for TM Scattering by Conducting Cylinders Partially Buried in a Dielectric Half-Space | Cengiz Ozzaim                                                                      | 51   |
| Microstrip Diplexer with Π-Shaped Matching Circuit                   | Aleksandr A. Leksikov, Alexey M. Serzhantov, Ilya V. Govorun, Aleksey O. Afonin and Andrey V. Ugryumov and Andrey A. Leksikov | 59   |
| Polarization Difference Smoothing in Bistatic MIMO Radar             | Karthick Subramaniam, Palanisamy Ponnusamy, and Srinivasa Rao Chintagunta                | 67   |
| A Novel Lumped LC Resonator Antenna with Air-Substrate for 5G Mobile Terminals | Shahawanz Kamal, Abdullahi SB Mohammed, Mohd Fadzil Bin Ain, Fathul Najmi Roslina Hussin, Zainal Arifin Ahmad, Ubaidullah, Mohamadareff Othman and Mohd Fariz Ab Rahman | 75   |
| A New Compact UWB Bandpass Filter with Quad Notched Characteristics  | Fengjing Liu and Mao Qun                                                                  | 83   |
A Dual Band Notched UWB Antenna with Optimized DGS Using Genetic Algorithm
Mohammed C. Derbal, Abdelbaki Zeghdoud, and Mourad Nedil ........................................ 89

A Novel Center-Fed SIW Inclined Slot Antenna for Active Phased Array
Yao Zong, Jun Ding, Chenjiang Guo, and Chao Li ......................................................... 97

Characterization of PVDF-Gr Composite Films for Electromagnetic Interference Shielding Application
Vikas Rathi, Varij Panwar, and Brijesh Prasad .............................................................. 105

A Dual-Band Antenna for LTE-R and 5G Lower Frequency Operations
Ashwini Kumar Arya, Seong Jin Kim, and Sanghoek Kim ........................................... 113

Compact Directional Coupled-Line Coupler with Independent Power Division Ratios at Dual Bands
Siyue Zhou, Xiaochuan Shen, Yongle Wu, and Yuanan Liu ........................................ 121

3D Printed Large Bandwidth New Yagi-Uda Antenna
Asmae Hachi, Hassan Lebbar, and Mohamed Himdi .................................................. 129

Miniaturized Branch-Line Coupler with Wide Upper Stopband Using Right-Angled Triangle Artificial Transmission Line
Lin Geng, Guang-Ming Wang, Bin-Feng Zong, Mao-Kai Hu, and Hui-Yong Zeng .............. 137

Compact Four-Element MIMO Antenna System Based on Substrate-Integrated-Waveguide Cavities
Bing-Jian Niu and Jie-Hong Tan ....................................................................................... 143
