**Table 1.** Consciousness level in the development and validation cohorts

|                | Development cohort (n=7,373) | Validation cohort (n=821) |
|----------------|------------------------------|----------------------------|
| **Japan Coma Scale** |                              |                            |
| 0              | 4,784 (64.9)                 | 554 (67.5)                 |
| 1              | 808 (11.0)                   | 82 (10.0)                  |
| 2              | 352 (4.8)                    | 73 (8.9)                   |
| 3              | 428 (5.8)                    | 40 (4.9)                   |
| 10             | 239 (3.2)                    | 33 (4.0)                   |
| 20             | 82 (1.1)                     | 5 (0.6)                    |
| 30             | 72 (1.0)                     | 2 (0.2)                    |
| 100            | 109 (1.5)                    | 8 (1.0)                    |
| 200            | 124 (1.7)                    | 14 (1.7)                   |
| 300            | 375 (5.1)                    | 10 (1.2)                   |
| **Glasgow Coma Scale** |                              |                            |
| 3              | 337 (4.6)                    | 8 (1.0)                    |
| 4              | 33 (0.4)                     | 2 (0.2)                    |
| 5              | 29 (0.4)                     | 2 (0.2)                    |
| 6              | 107 (1.5)                    | 8 (1.0)                    |
| 7              | 89 (1.2)                     | 10 (1.2)                   |
| 8              | 61 (0.8)                     | 7 (0.9)                    |
| 9              | 80 (1.1)                     | 6 (0.7)                    |
| 10             | 109 (1.5)                    | 8 (1.0)                    |
| 11             | 131 (1.8)                    | 16 (1.9)                   |
| 12             | 143 (1.9)                    | 8 (1.0)                    |
| 13             | 293 (4.0)                    | 25 (3.0)                   |
| 14             | 878 (11.9)                   | 123 (15.0)                 |
| 15             | 5,083 (68.9)                 | 598 (72.8)                 |

Data are shown as n (%).
