Picture Archiving and Communication System + Hospital Information System

CLM as indication for imaging
CLM as differential diagnosis

CLM Diagnosis
n=74

- No CLM, n=40
  - Age >18 years, n=10
  - Deceased, n=5

- CLM Diagnosed
  n=19

- Not Operated, n=5
  Extrathoracic CLM, n=1

- Contacted
  n=13

- MRI not feasible, n=3
  Participation rejected, n=2
  Not responding, n=3

- Enrolled
  n=5

CLM: congenital lung malformation
