Keywords: ocular hypertension, resting state functional magnetic resonance imaging, fractional amplitude of low-frequency fluctuation, left anterior cingulate cortex, left precuneus

A Corrigendum on

Characteristics of the Fractional Amplitude of Low-Frequency Fluctuation in Ocular Hypertension Patients: A Resting-State fMRI Study
by Liang, Y., Pan, Y.-C., Shu, H.-Y., Chou, X.-M., Ge, Q.-M., Zhang, L.-J., Li, Q.-Y., Liang, R.-B., Li, H.-L., and Shao, Y. (2022). Front. Med. 8:687420. doi: 10.3389/fmed.2021.687420

In the original article, there was a mistake in Table 2. Demographics and behavioral results of OH and HCs groups as published. The age of HC was incorrectly listed as 50.36 ± 54.22. The correct age of HC is 50.36 ± 5.42. The corrected Table 2 appears below.

In the original article, there was an error in the section Materials and Methods, sub-section Subjects. The subject characteristics: “18 HC patients (8 males and 8 females; mean age 50.36 ± 54.22 years; age range 20–60 years)” is incorrect. The correct sentence is: “18 HCs (9 males and 9 females; mean age 50.36 ± 5.42 years; age range 20–60 years)”.

In the original article, there was an error in the section Results, sub-section The Use of ROC. The sentence: “To test whether the ROC curve has potential as a diagnostic marker for OH, ROC curves were constructed using mean fALFF values of the two brain regions in the OH and HC groups. An area under the curve of 0.5–0.7 is considered to indicate low accuracy, 0.7–0.9 higher accuracy, and an area higher than 0.9 represents good accuracy. Accuracy was low in the left anterior cingulate gyrus (LAC) (0.9892; P < 0.0001; Figure 4A) and higher in the left anterior cuneiform (LP) > HC (0.8834; P < 0.0001; Figure 4B).” is incorrect. The sentence should be: “To test whether the fALFF value has potential as a diagnostic marker for OH, ROC curves were constructed using mean fALFF values of the two brain regions in the OH and HC groups. An area under the curve of 0.5–0.7 is considered to indicate low accuracy, 0.7–0.9 higher accuracy, and an area higher than 0.9 represents good accuracy. Accuracy was low in the left anterior cingulate gyrus (LAC) (0.9892; P < 0.0001; Figure 4A) and lower in the left precuneus (LP) (0.8834; P < 0.0001; Figure 4B).”

In the original article, there was an error in section Results, sub-section The fALFF Value. The values in the sentence: “The fALFF value of LP in the OH group was higher than in the HC group (t = 5.5535), while the fALFF value of LAC in the OH group was decreased (t = −3.7520; Figure 5)” are incorrect. They should be: “The fALFF value of LP in the OH group was higher than in the HC group (t = 5.5535), while the fALFF value of LAC in the OH group was decreased (t = −3.7520; Figure 5)”
group ($t = -3.7520$); while the fALFF value of LAC in the OH group was decreased ($t = 5.5535$) (Figure 5).”

The authors apologize for these errors and state that they do not change the scientific conclusions of the article in any way. The original article has been updated.

## TABLE 2 | Demographics and behavioral results of OH and HCs groups.

|                | OH       | HC       | T-value | P-value |
|----------------|----------|----------|---------|---------|
| Male/female    | 9/9      | 9/9      | N/A     | >0.99   |
| Age (years)    | 51.18 ± 5.22 | 50.36 ± 5.42 | 0.325   | 0.872   |
| Handedness     | 18 R     | 18 R     | N/A     | >0.99   |
| Duration (years) | 1.12 ± 0.32 | N/A     | N/A     | N/A     |
| Best-corrected VA-L | 1.00 ± 0.10 | 1.05 ± 0.15 | 0.989   | 0.121   |
| Best-corrected VA-R | 1.05 ± 0.15 | 0.95 ± 0.10 | 0.086   | 0.127   |
| IOP-L          | 27.56 ± 6.67 | 15.69 ± 4.86 | 12.087  | 0.012   |
| IOP-R          | 27.61 ± 5.32 | 14.78 ± 4.39 | 11.537  | 0.009   |
