Published 25 February 2021

This article has been retracted by IOP Publishing at the request of the authors, who have identified errors in both the measurements and treatment processes of the mesh samples. These errors suggest the results and conclusions presented in the article may not be reliable. IOP Publishing has investigated in accordance with the Committee for Publication Ethics (COPE) guidelines and it was agreed the article should be retracted. The authors apologise to the readers, conference organisers and IOP Publishing for these errors.
