(iScience 25, 103937; March 18, 2022)

In the original version of this article, the inset color descriptions of the black line in Figure 1D were mislabeled. The black line should be NCP 500 mM NaCl instead of nucleosome 500mM NaCl. We have made the change in the revised Figure 1 and corrected the figure legend accordingly, and these changes have been reflected online. All authors agree to the correction and confirm that this does not impact the scientific message of the paper, and they apologize for any inconvenience caused to the readers.
