In the paper [PASJ 51, 321-331 (1999)], We have two errors:

Though the value of $iV_{hi} (\text{hoie})$ in p324 r, 1 10 and in p325 r, 1 2 was $3.0 \times 10^{20}$ cm$^{-2}$ in the original paper, the correct value is $3.0 \times 10^{21}$ cm$^{-2}$.

Furthermore, the paper of Ptak and Griffiths cited in Note added in proof in the original paper has been already published in ApJ 517, L85 (1999).
