SUPPLEMENTAL MATERIAL

Sawai et al., http://www.jem.org/cgi/content/full/jem.20130443/DC1

A supplemental dataset, available as a .TXT file, contains the microarray probes; hybridization signal values (Log_{10}) for Runx2-deficient knockout (KO) and control wild-type (WT) pDC samples; gene symbols and mRNA accession nos. The probes corresponding to the pDC signature gene set (Elpek et al., 2011) are indicated. The probes within the pDC signature that were reduced >2-fold in Runx2-deficient pDCs are indicated as well.
