### Participants (≥30 years old) who had undergone PCI between January 2010 and December 2013 (n=199,714)

### Participants who received health examination within 1 year from the date of their PCI (n=114,610)

### Participants with type 2 diabetes mellitus (n=41,866)

#### Exclusion of participants
- Who had a history of repeat PCI within 1 year after their prior PCI (n=3,325)
- Who had a prescription record of antidiabetic drug <30 days (n=777)
- Who died within 1 year from the date of their PCI was done (n=1,312)
- Missing data (n=1,104)

### Final study population for analysis (n=35,348)

**Supplemental Fig. S1.** Flow chart of study population. PCI, percutaneous coronary intervention.
